MICROMAX SUGAR MILLS ERP · CANE ACCOUNTS GUIDE

Grower payments

How growers are paid for their cane: the bank balances available, the unpaid scroll, the payment scroll and its bank check, the bank payment schedule and letters, and the grower loans recovered inside each CPR.

1 · CPR
At tare: net, payable, loan cut.

2 · Balances
Bank balance – draft scrolls = available.

3 · Scroll
CPRs, bank chosen, balance must cover it.

4 · Pay
One payment per grower, CPRs paid, SMS.

5 · Documents
Schedule, letters, bank file, vault.

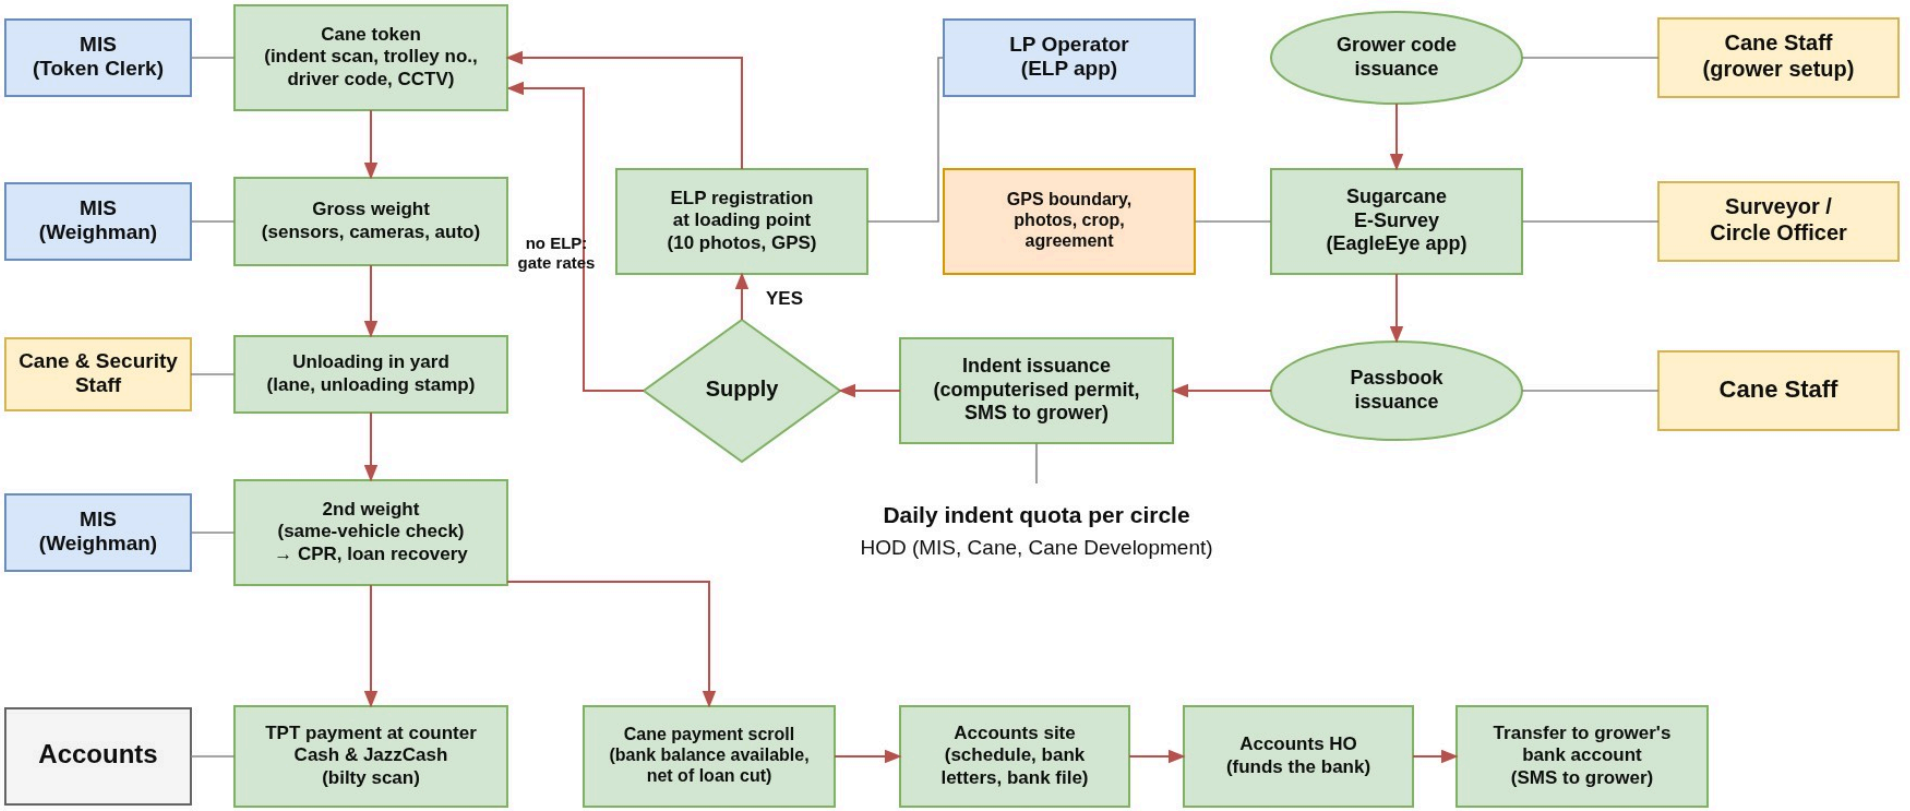

Who: **Cane Accountant** (scrolls, documents) · **Cane Admin** (pay over the balance, stop payments) · **Accounts HO** (funds the banks).

The loan cut in a CPR

At the 2nd weight the CPR is made: the net weight × rates, less road cess and TPT. If the grower has a loan, up to the loan type's share of that net is **recovered at once**: the CPR shows the loan cut, and the grower is owed the rest (*payable*). The scroll pays the payable, so the loan is never paid out and then asked back.

CPR value (after TPT)	– Loan recovered	= Paid by the scroll
e.g. Rs 1,31,193	– Rs 8,899 (LN-26-… Crop Cash)	Rs 1,22,294

Process Flow of Cane Accounting — MicroMax ERP

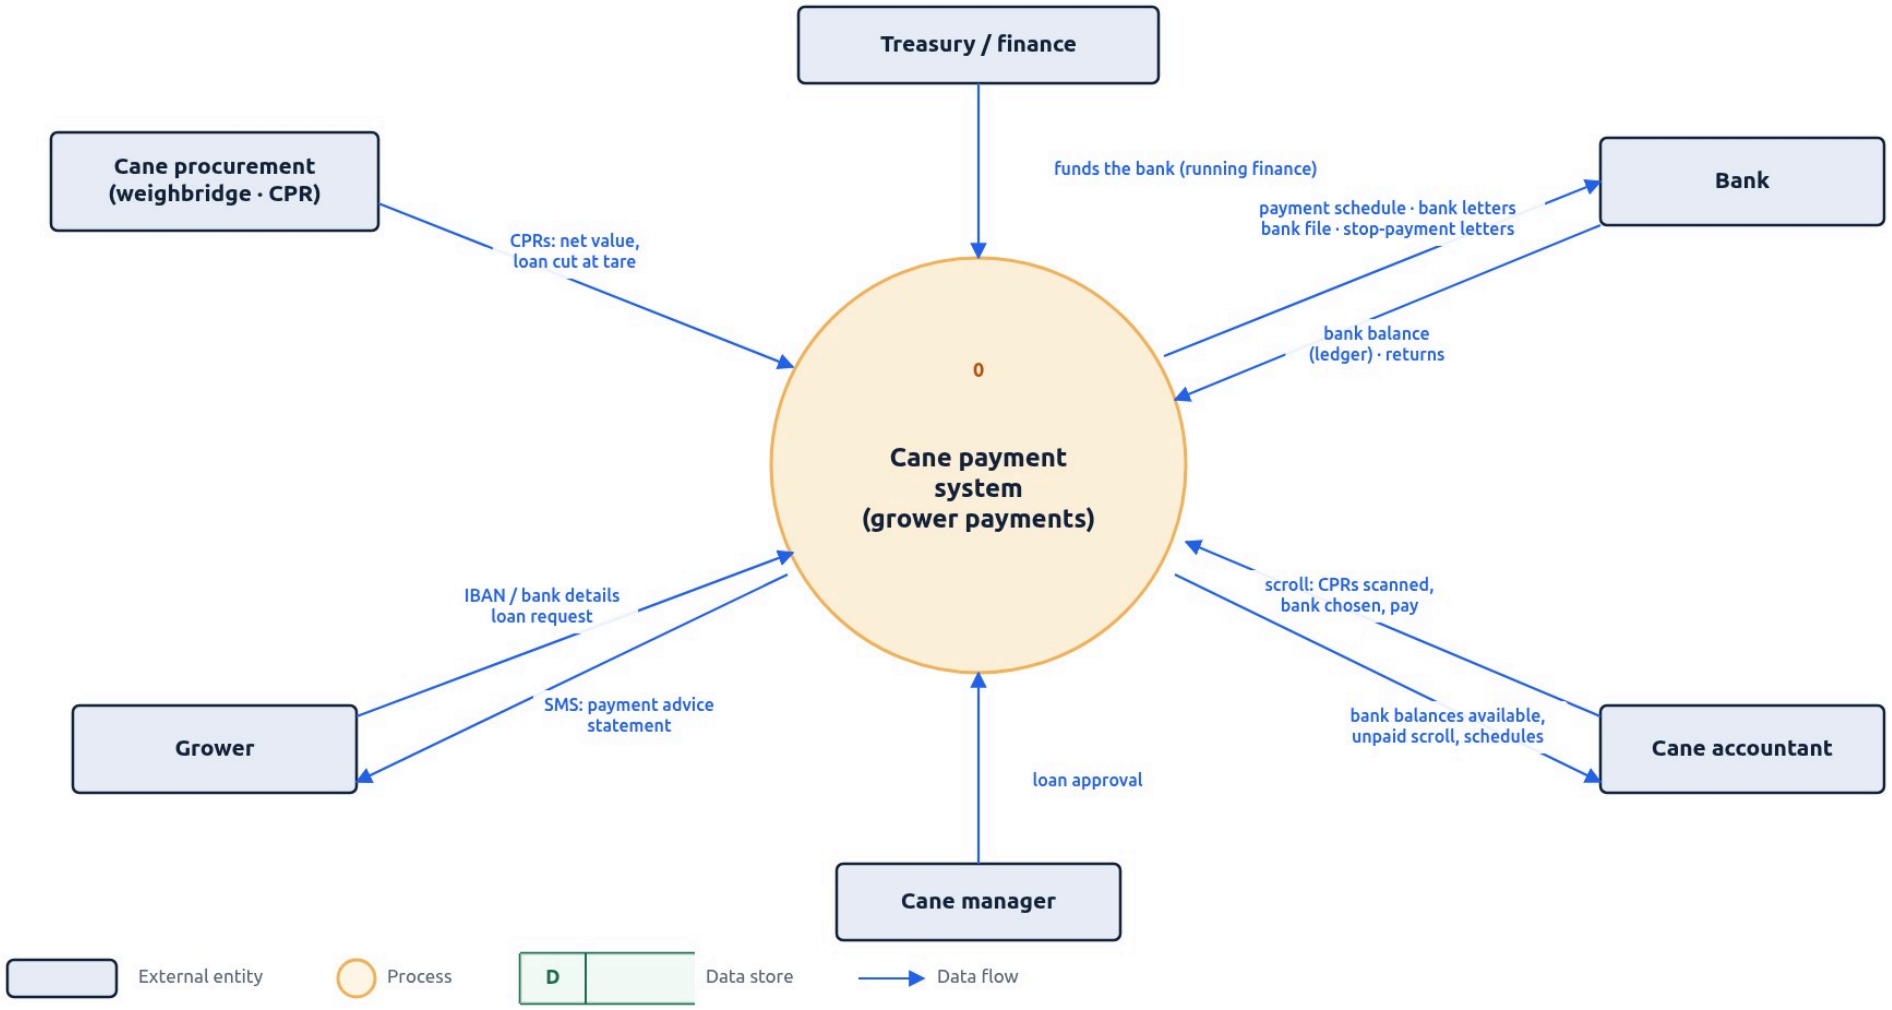

The CPR carries the grower's loan recovery (cut at tare) — the scroll pays the net; TPT is paid to the driver at the counter.

DFD level 0 — context: grower payments

MicroMax Sugar Mills ERP

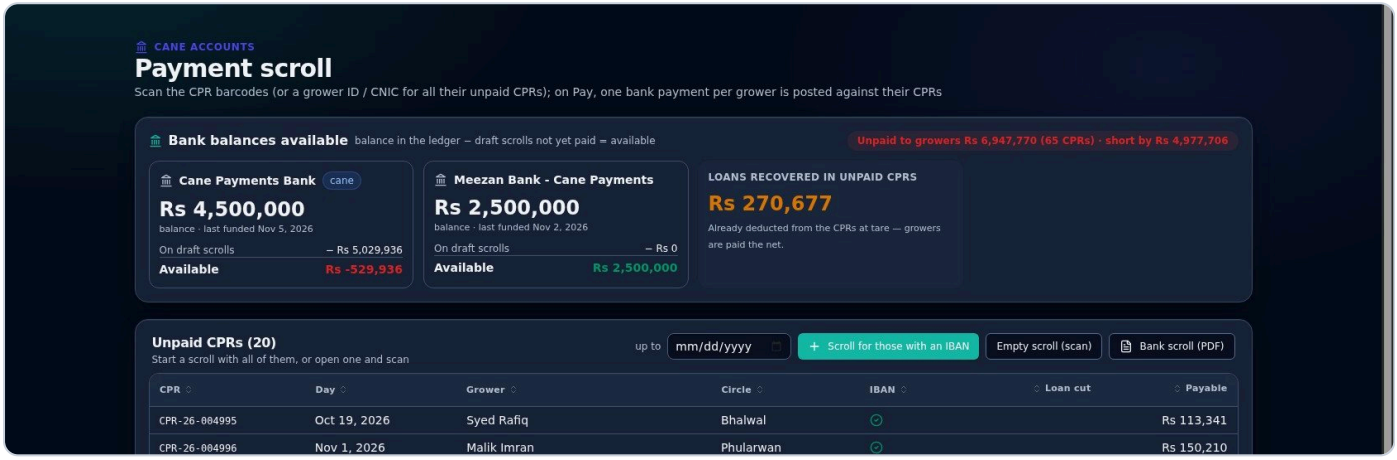

DFD level 1 — grower payments

1.0 CPR · 2.0 unpaid & balances · 3.0 scroll · 4.0 pay · 5.0 documents

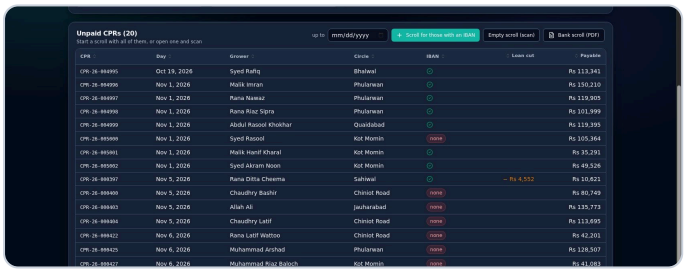

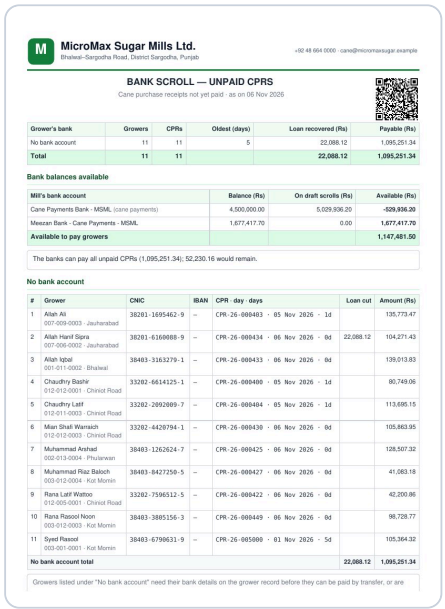

1 Bank balances available and unpaid CPRs

1. Open **Cane Accounts → Payment scroll**. **Bank balances available** shows each mill bank account: its **ledger balance**, what **draft scrolls** on it will take, and the **available** amount.
2. The badge compares the banks with what is **unpaid to growers**: covered, or short by how much. **Loans recovered in unpaid CPRs** shows what was already cut.
3. The list shows every unpaid CPR, with the grower's IBAN, the **loan cut** and the payable. **Loan adjustments** lists each CPR with a loan cut and the loans it paid.
4. **Bank scroll (PDF)**: the unpaid CPRs by the grower's bank, with the loan cut and the bank balances available, for the accounts head.

Cane Payments Bank: Rs 45 lakh, less Rs 50.3 lakh on draft scrolls; Meezan: Rs 25 lakh available.

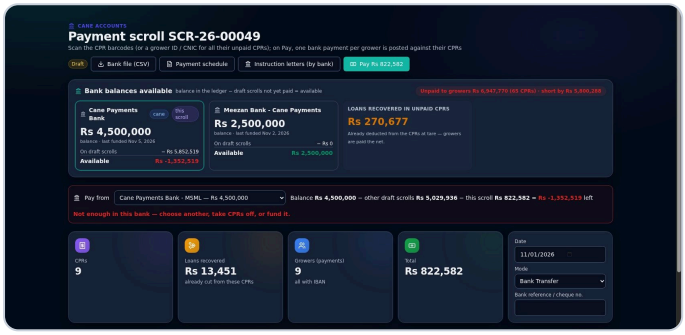

Loan adjustments: CPR value, loan recovered, paid to the grower, and the loan.

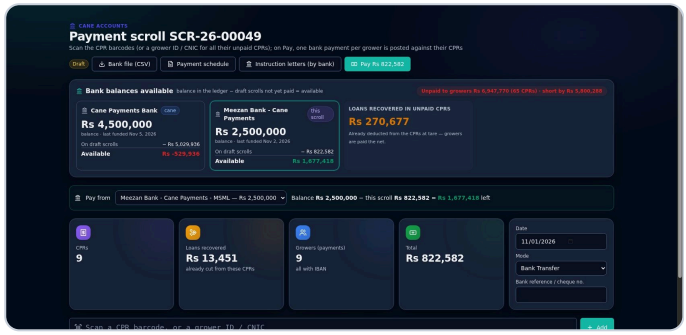

Unpaid scroll (A4) with the bank balances available.

2 The payment scroll — choose the bank

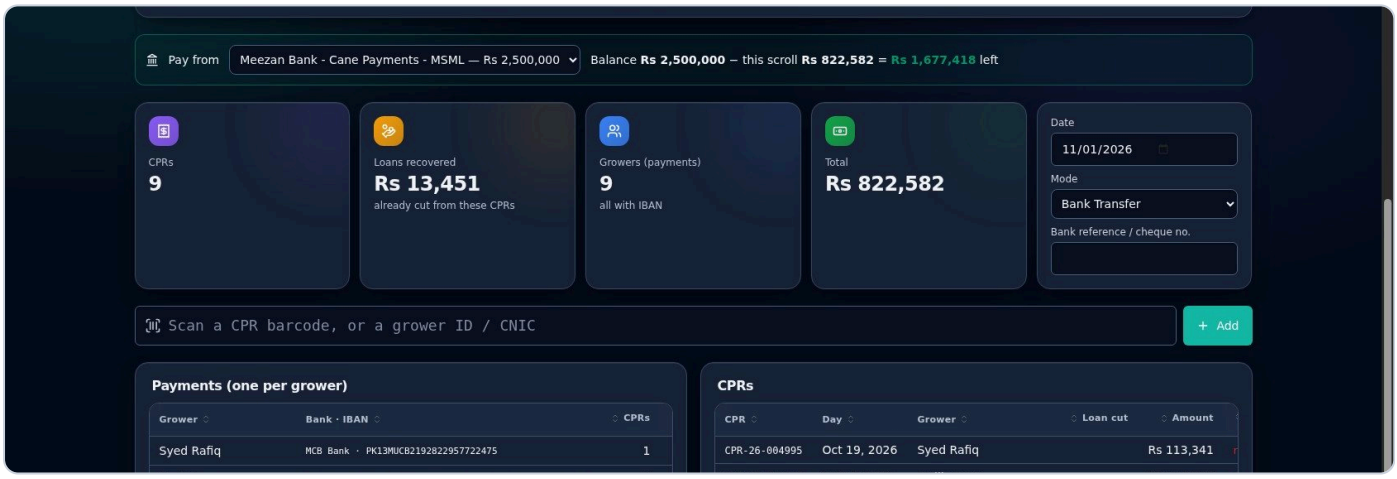

1. **Scroll for those with an IBAN** (optionally CPRs up to a date), or **Empty scroll (scan)** and scan CPR barcodes, a grower ID or a CNIC.
2. **Pay from**: choose the mill's bank. The box shows *balance − other draft scrolls − this scroll = left*. If it is not enough, it turns **red** and the scroll can't be paid from that bank.
3. Choose another bank, take CPRs off, or ask Accounts HO to fund the account. A **Cane Admin** can pay over the balance; this is recorded on the scroll.
4. Check **Payments (one per grower)**: bank and IBAN, CPRs, loan cut and amount. Growers without an IBAN must be fixed, removed, or paid by cheque.

Cane Payments Bank: not enough after the other draft scrolls.

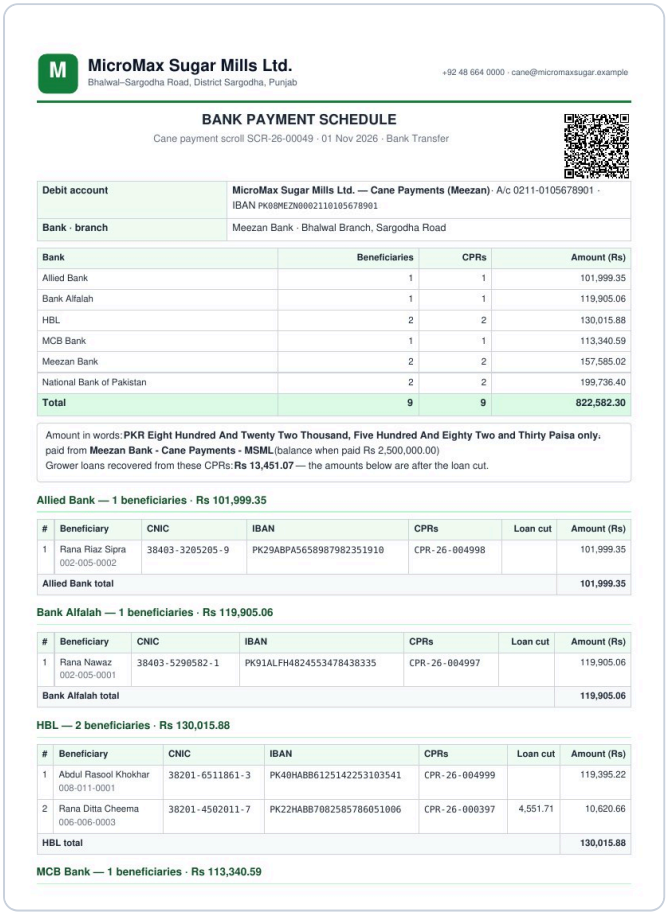

Pay from Meezan: Rs 25 lakh − Rs 8.2 lakh = Rs 16.8 lakh left.

One payment per grower; the loan cut shown for each.

3 Pay, and the bank documents

1. **Pay**: one bank payment per grower is posted (**Dr Grower Payable · Cr** the chosen bank), against that grower's CPRs. The CPRs are marked paid and each grower gets an SMS. The bank balance at that moment is kept on the scroll.
2. **Payment schedule**: the debit account (the bank actually chosen), totals by the growers' banks, and each beneficiary with IBAN, CPRs, loan cut and amount.
3. **Instruction letters (by bank)**: one letter to the paying bank for each beneficiary bank, with the annexure of accounts. **Bank file (CSV)** is for internet banking upload.
4. A transfer comes back? **stop payment** on that line prints the stop-payment letter. Every document is kept in the **Document vault**.

MicroMax Sugar Mills Ltd. · Letter 1 of 6 for scroll SCR-26-00049 · Printed 02 Nov 2026 00:57 by Administrator

Instruction letter to Meezan for the Allied Bank beneficiaries.

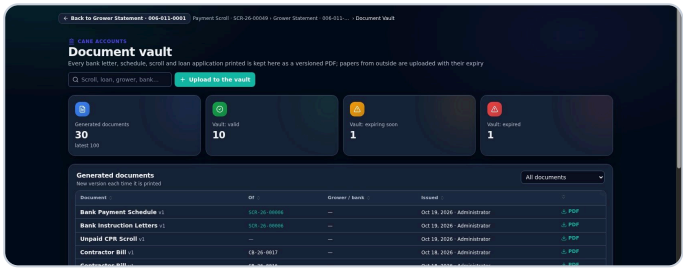

4 After payment

Paid from Meezan; balance when paid recorded.

Grower statement: cane, loan recovery from the CPR, bank payment, running balance.

Document vault: every schedule and letter, versioned, with a QR code.

You see	Do this
"… holds …, of which … is on other draft scrolls"	Choose another bank, take CPRs off, pay or delete old draft scrolls, or get the account funded.
"… grower(s) have no IBAN"	Add the grower's bank details, take the CPR off, or pay this scroll by cheque.
"Set up the Bank Account … before printing"	Accounts: create the company Bank Account (bank, A/c no., IBAN, branch) for that ledger account.
"CPR … is already on scroll …"	Each CPR can be on one draft scroll only.
