MICROMAX SUGAR MILLS ERP · CASHIER GUIDE

# TPT cash counter bilty payment

How the cashier pays drivers their carriage (TPT) against the bilty: opening a counter for the shift, cash from the strong room, scanning one or several bilties, paying in cash or by JazzCash with the payee display, and closing the shift with a counted till.

**1 · Open**
Counter + shift. Opening = last close.

**2 · Cash in**
Receive from the strong room.

**3 · Scan**
One or more bilties into the basket.

**4 · Pay**
Cash or JazzCash, CNIC checked, slips print.

**5 · Close**
Count notes, short / excess, Z report.

Who: **Cane Cashier** (counter) · **Strong room in-charge** (cash in / out) · **Cane Accountant / Manager** (summary, short & excess).

## The till in one line

**Opening + received from strong room – returned to strong room – cash paid = current balance**

The current balance is always on screen. Cash can never be paid beyond it. JazzCash payments come from the mill's JazzCash wallet, not the till, so they don't change it.

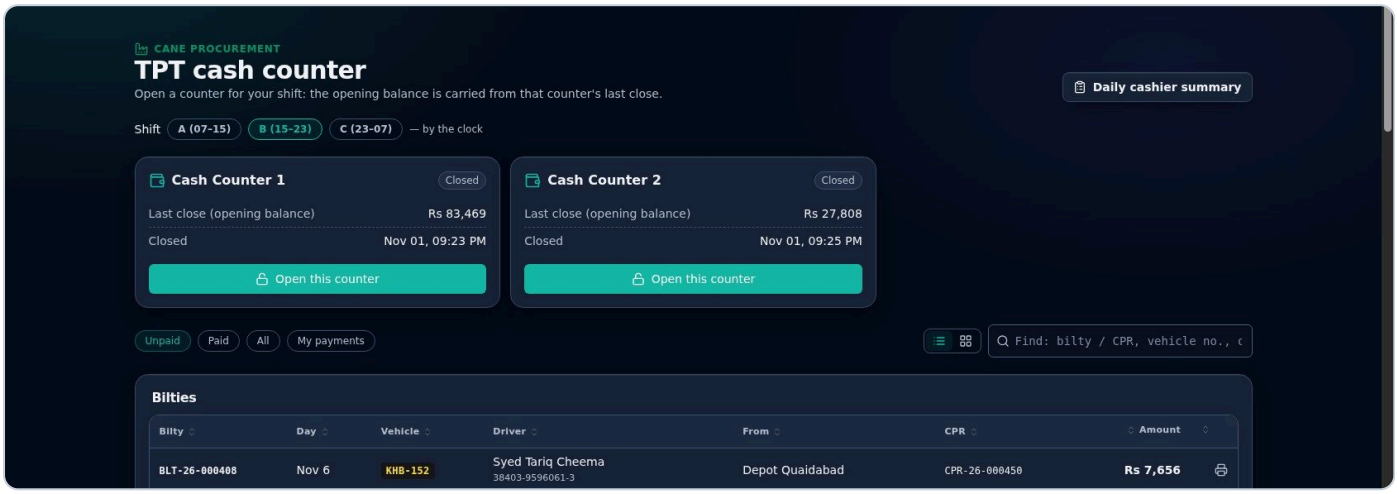

| Screen | Where | Used for |
|---|---|---|
| **TPT cash counter** | Cane Procurement → TPT cash counter | Open the shift, strong room cash, scan and pay bilties, history, close. |
| **Payee display** | Cane Procurement → Payee displays → Cash Counter 1 / 2 (second screen, F11) | Faces the driver: his name, bilties, total, then PAID — in English and Urdu. |
| **Daily cashier summary** | Cane Procurement → Daily cashier summary | All shifts of a day, by shift and counter; excess & short register; A4 reports. |

**Scanning:** a barcode scanner reads the bilty and presses Enter itself. Without one, type the bilty no. (or its CPR) and press Enter.

Screens in this guide are from the MicroMax test system with demo data (1 November 2026). Video: *09-TPT-cash-counter-bilty-payment-with-payee-display.mp4*.

## 1 Open the counter for your shift

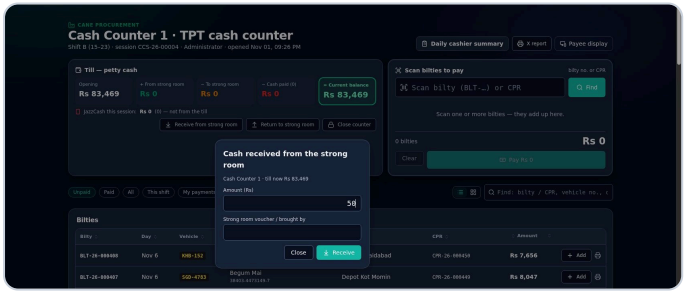

1. Open **TPT cash counter**. Choose the **shift**: A 07–15, B 15–23 or C 23–07. The current one is picked by the clock.
2. Click **Open this counter** on **Cash Counter 1** or **2**. Its **opening balance** is that counter's last counted close. You can't type or change it.
3. A counter already open by someone else shows **Open · name**. Each cashier can have only one counter open.

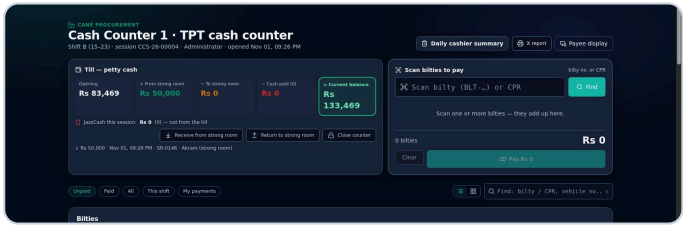

Shift chosen; each counter shows its last close (the opening balance).

## 2 Cash from the strong room

1. Click **Receive from strong room**. Enter the amount and the strong room voucher no. or who brought it, then click **Receive**.
2. Extra cash goes back with **Return to strong room**. You can't return more than the till holds.

Rs 50,000 received against voucher SR-0146.

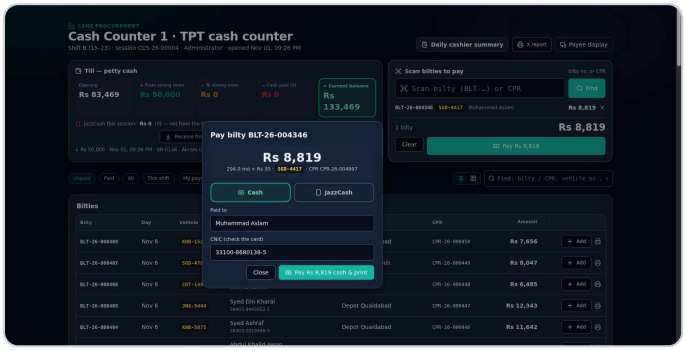

The till: opening, + strong room, – returned, – cash paid, = **current balance**.

> Each move is posted at once: **Dr Cash Counter (this till) · Cr Strong Room Cash** (the reverse when returned).

## 3 Pay one bilty

1. The driver gives his **bilty** and **CNIC**. **Scan the bilty** into *Scan bilties to pay*. It goes into the basket, and the payee display shows his name, the bilty and the amount.
2. Click **Pay**. Check **Paid to** and the **CNIC** against his card. Choose **Cash** (or JazzCash, see section 5).
3. Click **Pay … cash & print**. The bilty slip prints marked **PAID in cash**, the display shows **PAID**, and the till goes down by the amount.

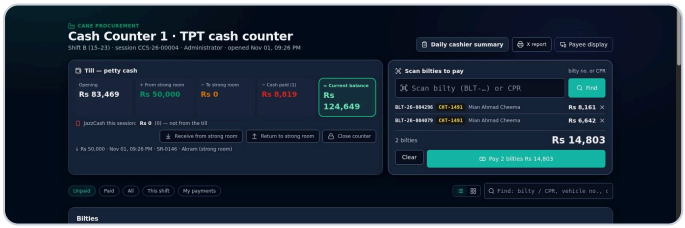

Bilty BLT-26-004346 · Rs 8,819 · paid to Muhammad Aslam, CNIC checked.

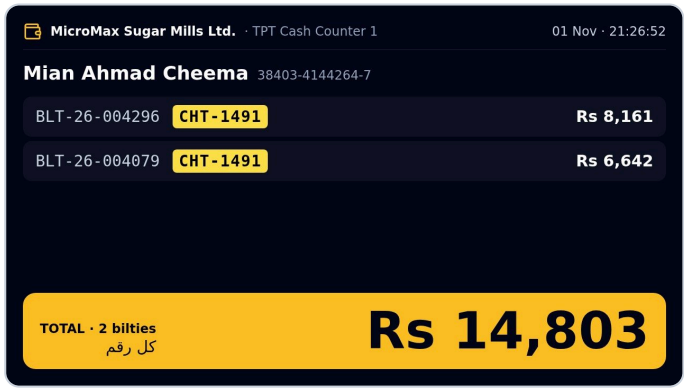

Payee display while paying: name, bilty, vehicle, total.

## 4 Pay several bilties together

1. Scan each bilty. They add up in the basket (remove one with ×). The display shows all of them and the **total**.
2. Click **Pay N bilties**. One payment to one person: if the bilties belong to different drivers, a warning asks you to write who receives the money (e.g. the transporter).
3. For cash, the total must be in the till. Otherwise *"The till holds … — receive cash from the strong room first"*. All the slips print together.

Two bilties of Mian Ahmad Cheema in the basket: Rs 14,803.

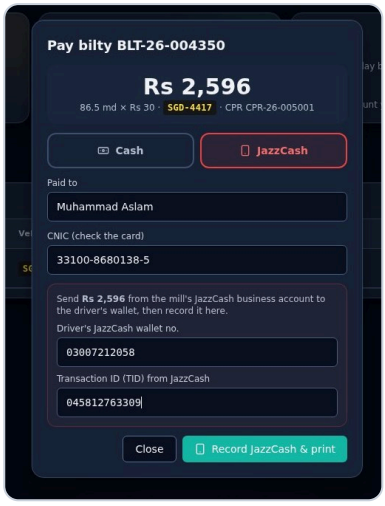

The driver sees both bilties and the total.

## 5 JazzCash instead of cash

1. In the pay box choose **JazzCash**.
2. Send the amount from the mill's **JazzCash business account** (app or portal) to the driver's wallet. One transfer covers the whole basket.
3. Enter the **wallet no.** (11 digits, starting 03; filled from the driver record) and the **transaction ID (TID)** JazzCash shows.
4. Click **Record JazzCash & print**. A TID can't be used twice.

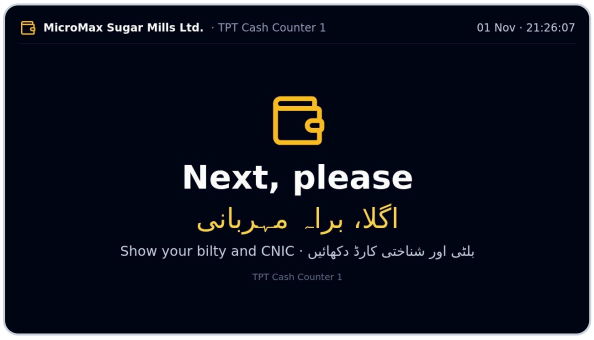

> Posted **Dr TPT-Bilty Payable · Cr JazzCash Wallet - TPT**. The till doesn't change.

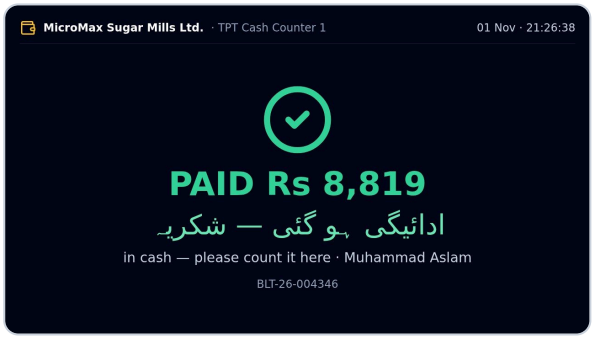

JazzCash: wallet no. and TID recorded.

## 6 The payee display

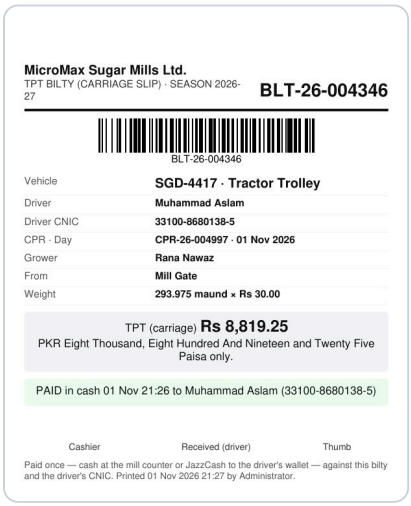

A second screen at the counter window, facing the driver. Open **Payee displays → Cash Counter 1** on that PC (logged in as a cashier user) and press F11. It follows the counter by itself:

Waiting: "Next, please", with the counter's note.

After payment: PAID, the amount, cash or JazzCash, for about 12 seconds.

The bilty slip printed at payment: PAID in cash, time and receiver.

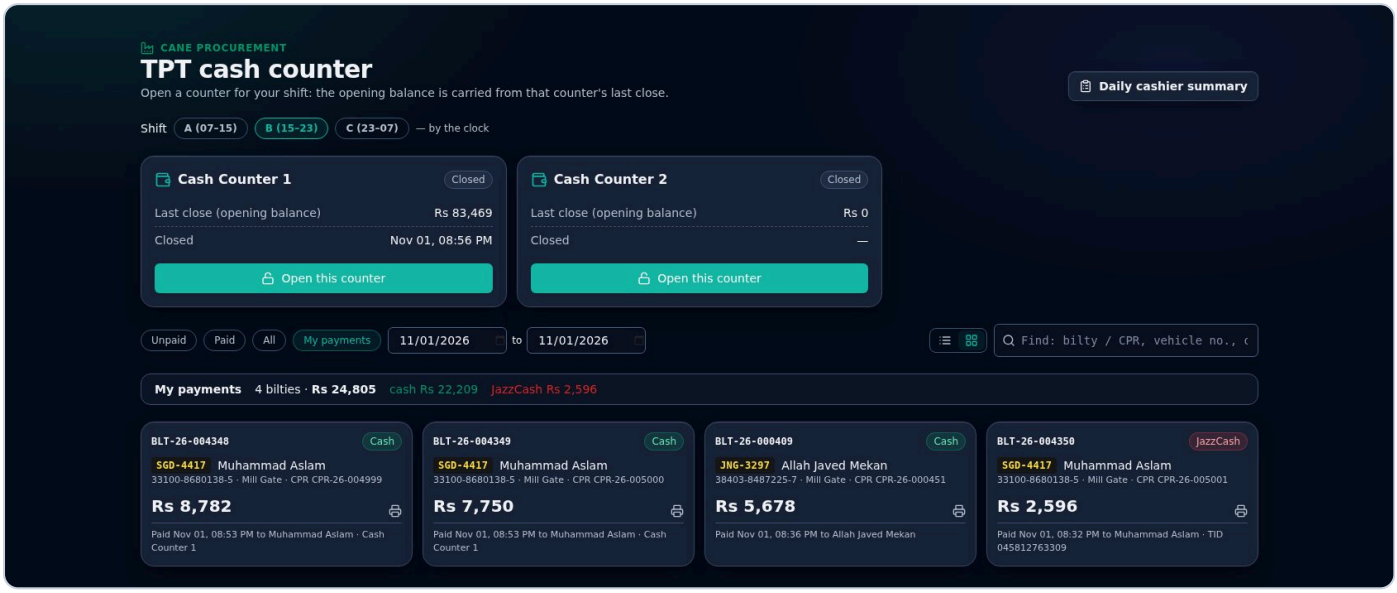

### What each cash payment records

| On the bilty | In the accounts |
|---|---|
| Status **Paid**, amount, cash / JazzCash, time, cashier, paid-to + CNIC, counter, shift, batch | Cash Entry: **Dr TPT-Bilty Payable**, **Cr Cash Counter** (that till) |

A wrong payment can be **reversed** by a Cane Admin (↺ in the list, with a reason). The bilty becomes unpaid again, the entry is cancelled, and the cash is back in the till.

## 7 Your payments

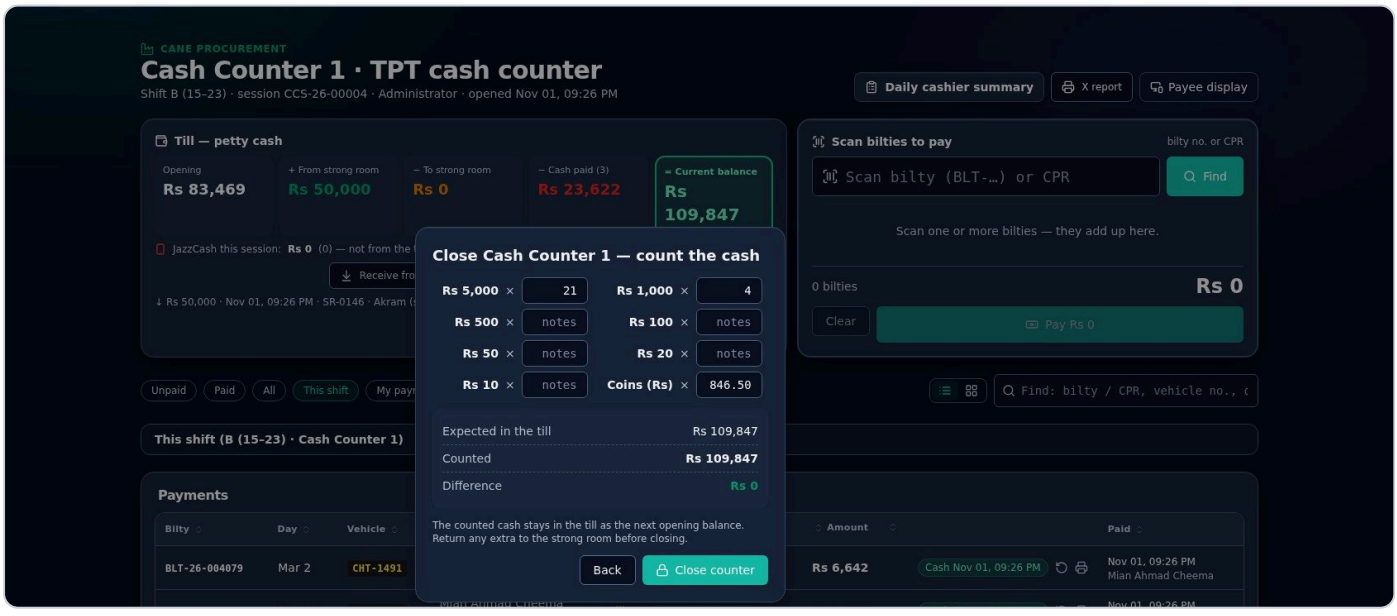

Under the counter: **Unpaid · Paid · All · This shift · My payments** (with dates). **This shift** and **My payments** show the cash and JazzCash totals. Switch between **list** and **card** view with the two buttons next to the search box.

My payments, card view: each bilty with how, when and to whom it was paid.

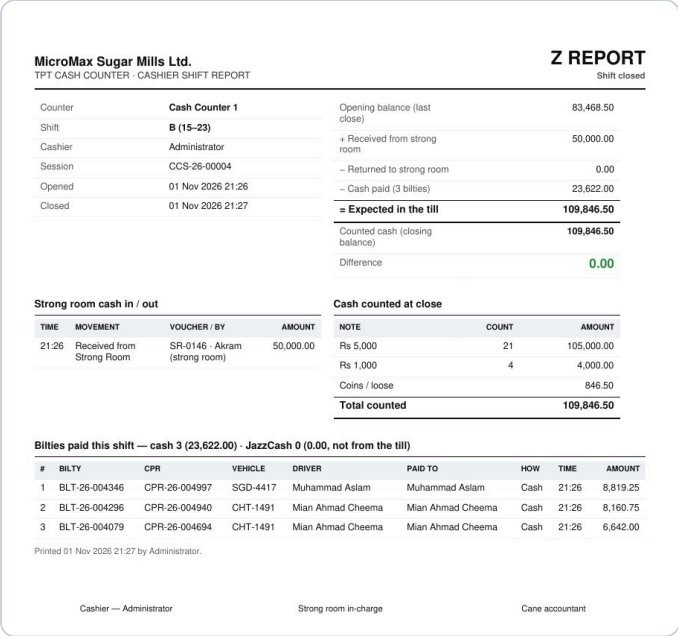

## 8 Close the shift

1. Return any extra cash to the strong room first. The cash left in the till is the next opening balance.
2. Click **Close counter**. Count the notes: **Rs 5,000 … Rs 10** by number, and **coins / loose** as an amount in rupees and paisa.
3. The box shows **expected**, **counted** and the difference. A **short** or **excess** needs a reason, and is posted to **Cash Short and Excess**.
4. Click **Close counter**. The **Z report** (A4) prints. The **X report** button prints the shift so far at any time.

Counted Rs 1,09,846.50 = expected: no short or excess.

# 9 Z report and daily cashier summary

Printed 01 Nov 2026 21:27 by Administrator.

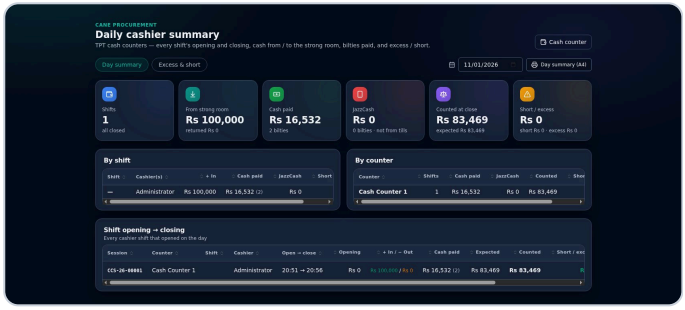

Cashier — Administrator  Strong room in-charge  Cane accountant

Z report: cash-up, strong room, notes counted, bilties, signatures.

**Daily cashier summary** (menu) for a date:

- totals: shifts, strong room, cash paid, JazzCash, counted, short / excess;
- **by shift** and **by counter**;
- every shift's **opening** → **closing**, with its X / Z report;
- **Day summary (A4)** for signatures.

The **Excess & short** tab covers any date range: each cashier's closes with a difference, the reason and the posted entry.

Daily cashier summary.

## If something goes wrong

| You see | Do this |
|---|---|
| "Open your cash counter first" | Open a counter for your shift (section 1). |
| "The till holds … — receive cash from the strong room first" | Receive cash, or pay by JazzCash. |
| "Bilty … is Paid" | Already paid. Check **Paid** to see when and to whom. Don't pay again. |
| "Cash Counter 1 is already open (…)" | Another cashier has it open. Use the other counter, or ask them to close. |
| "Transaction ID … is already recorded" | That JazzCash TID was used before. Check the transfer. |
| Count doesn't match | Count again. If it's still off, write the reason. The short / excess is posted and shows in the register. |
| Payee display shows "log in" | Log in on the display PC with a cashier user, then reopen Payee displays. |

**Admin:** counters are under *Cash Counter* (each with its own Cash-type account). The strong room, short / excess and JazzCash accounts are in *Sugar Settings*. All are created on update. To add a counter, give it a name and its cash account.
