MICROMAX SUGAR MILLS ERP · GROWER LOANS GUIDE

Grower loans

How a grower's loan moves through the mill: the eligibility criteria, the request with the grower's history, the field survey, approval by the Cane Manager, disbursement by the accountant, and recovery from the grower's cane.

1 · Criteria
Per loan type: limits, acres, survey rule.

2 · Request
Grower, type, amount — history and eligibility shown.

3 · Field survey
Surveyor visits: acres, crop, photos, GPS, recommendation.

4 · Approve
Cane Manager — eligible, verified, recommended.

5 · Disburse
Bank entry; recovered from each CPR.

Who: **Circle Officer / accounts** (request), **Surveyor** (field survey, on the phone), **Cane Manager** (approve / reject), **Cane Accountant** (disburse, repayments).

1 Eligibility criteria

Set once per **loan type** (Cane Accounts → Records → Loan Types). The grower may borrow the **lowest** of the limits, less what he already owes:

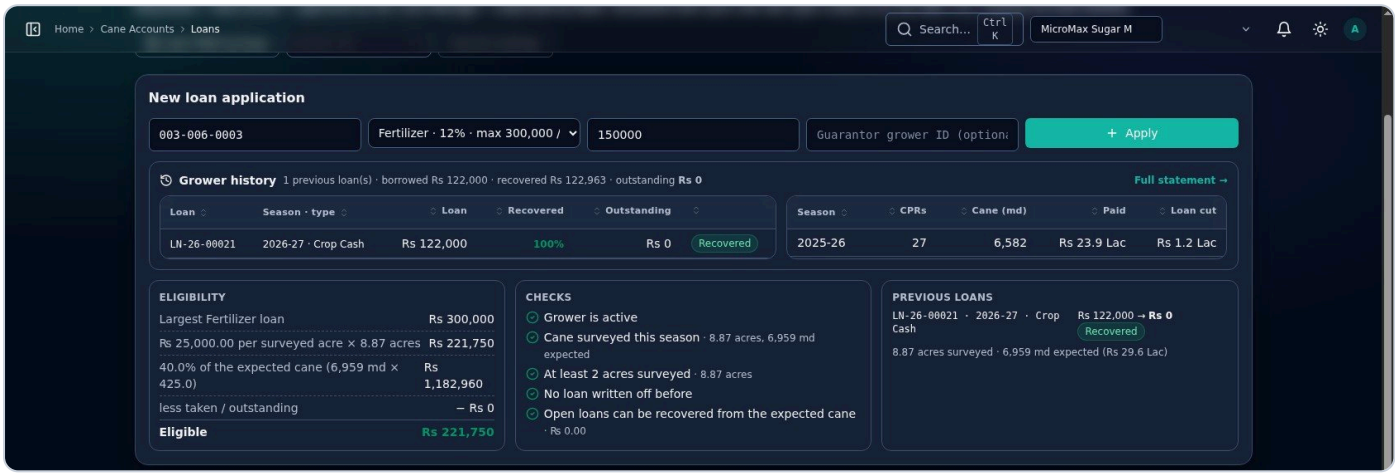

Criterion	Example (Fertilizer)
Largest loan	Rs 3,00,000
Largest loan per surveyed acre	Rs 25,000 × acres in this season's survey
Share of the expected cane	recovery % × expected maunds × govt rate
Minimum surveyed acres	2 acres
Field survey before approval	Yes
Markup · recovery	12 % a year · up to 40 % of each CPR's net after TPT

The system also checks every request. The grower must be active and have cane surveyed this season. He must have no loan written off before, and his open loans must be recoverable from his expected cane. If he has a guarantor, the guarantor must grow cane and guarantee at most 2 other loans.

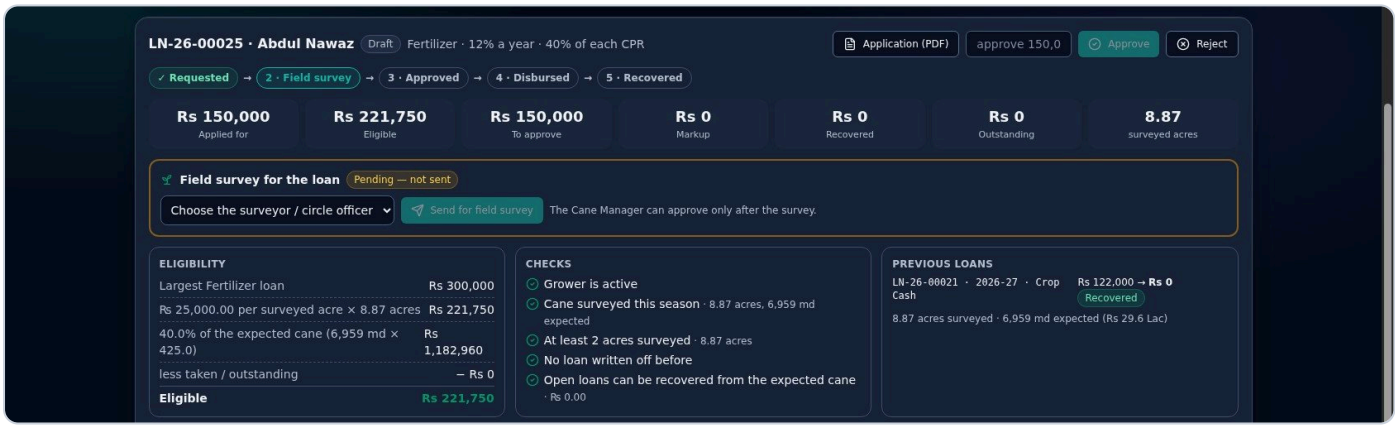

2 Loan request — with the grower's history

1. Open **Cane Accounts** → **Grower loans**. Under **New loan application**, type the **grower ID**. His **history** appears: every previous loan with % recovered, and the cane he supplied each season.
2. Choose the **loan type**. **Eligibility** shows each limit, the eligible amount and every check (✓ / ✗).
3. Enter the **amount** (not more than eligible), and a guarantor if needed. Click **Apply**. The request opens with its steps: Requested → Field survey → Approved → Disbursed → Recovered.

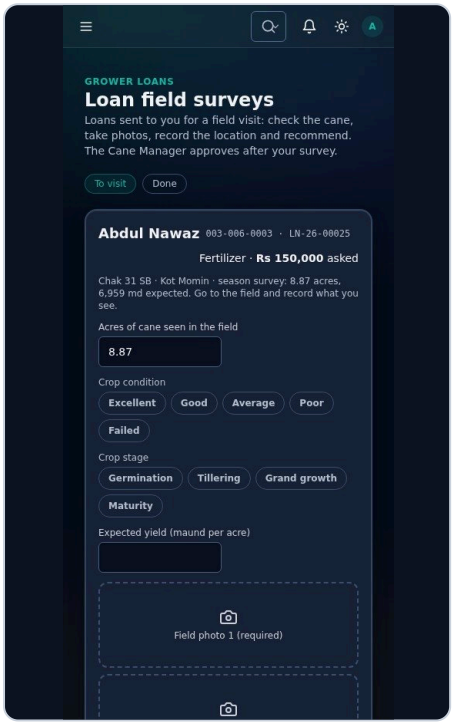

Abdul Nawaz: previous loan 100 % recovered, 6,582 md supplied in 2025-26; eligible Rs 2,21,750; all checks passed.

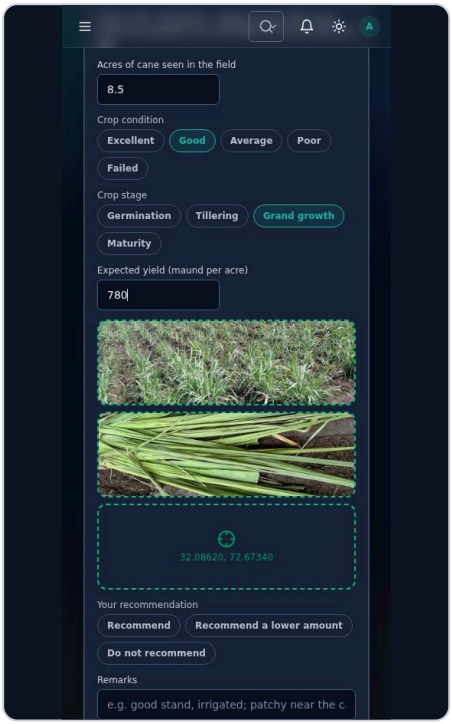

The request: Rs 1,50,000 applied for; the field survey is the next step.

3 Field survey (loan verification)

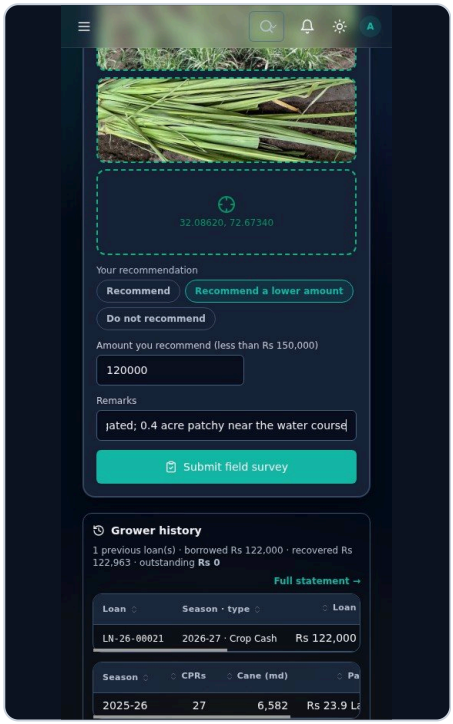

1. On the request, under **Field survey for the loan**, choose the area **surveyor / circle officer** and click **Send for field survey**.
2. The surveyor opens **Loan field surveys** on the phone (EagleEye Survey menu) and goes to the field.
3. He records **acres of cane seen**, **crop condition** and **stage**, **expected yield**, **two field photos** (the first is required) and the **GPS location**.
4. He gives a **recommendation**: *Recommend* · *Recommend a lower amount* (with the amount) · *Do not recommend* (with the reason). Then **Submit field survey**.

Visits sent to this surveyor.

Acres, condition, stage, photos.

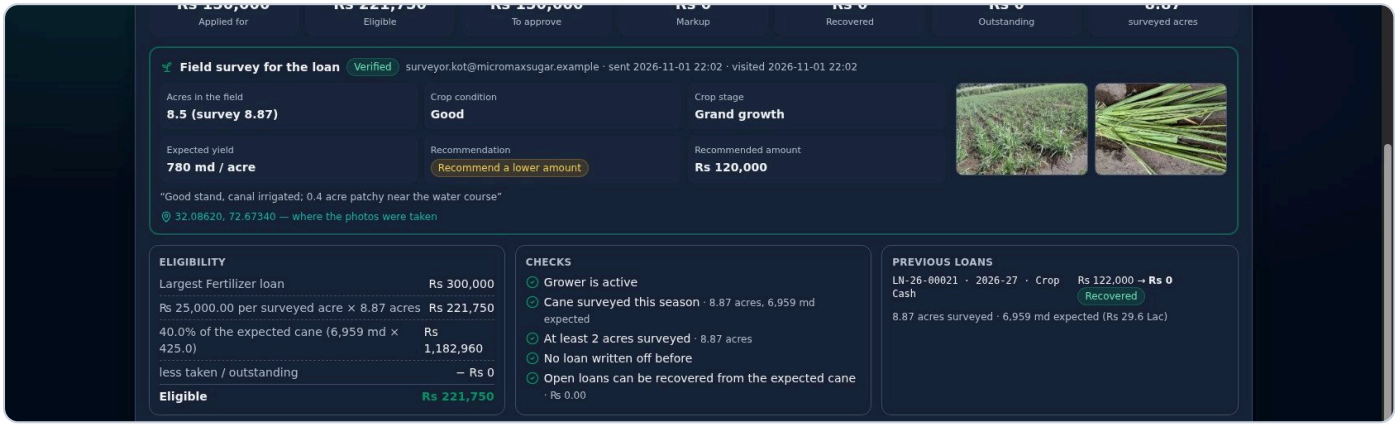

GPS and the recommendation.

> The Cane Manager **can't approve** until the survey is done, can't approve a *Do not recommend*, and can't approve more than the recommended amount.

4 Approval or rejection

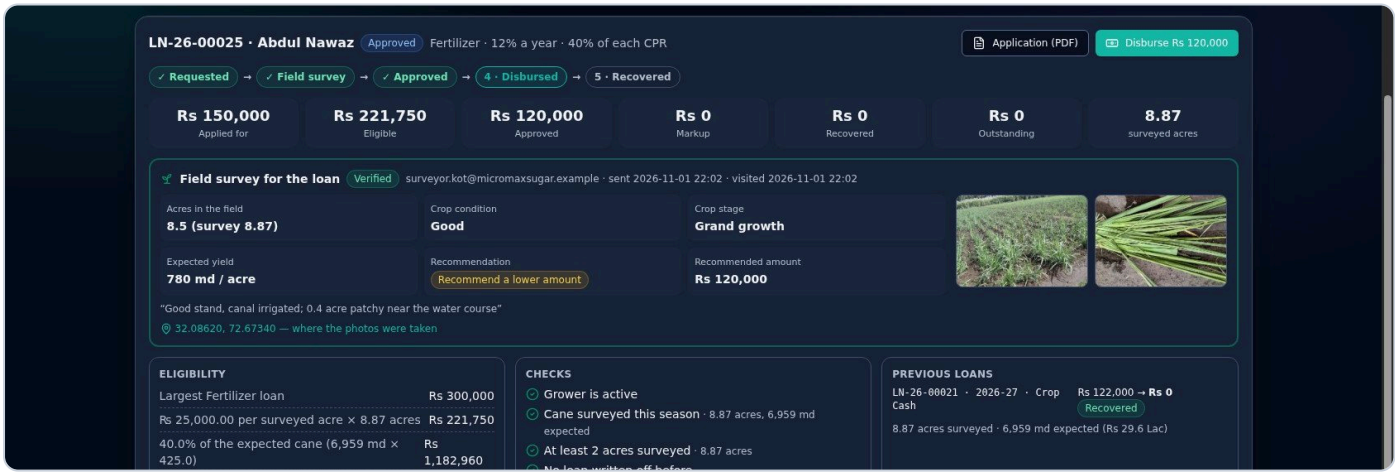

1. The request now shows the survey: findings, photos (click to enlarge), map link, recommendation and amount — next to eligibility and history.
2. **Approve**: the amount defaults to the recommended amount (here Rs 1,20,000). Or **Reject** with a reason. Rejected requests stay in the grower's history.

Survey: 8.5 acres seen (8.87 surveyed), Good, Grand growth, 780 md/acre, recommend Rs 1,20,000, photos and GPS.

5 Disbursement and recovery

1. The accountant clicks **Disburse**. A bank entry is posted: **Dr Grower Loan Receivable** (party: the grower), **Cr** the cane payments bank. The grower gets an SMS.
2. From then on each **CPR** of the grower recovers up to the type's share of its net after TPT, oldest loan first. Markup is accrued monthly. Cash repayments and write-offs are recorded on the loan.

Approved Rs 1,20,000 → Disburse.

GROWER LOAN APPLICATION
LN-26-00025 · Fertilizer (Fertilizer) · season 2026-27 · applied 01 Nov 2026 **Disbursed**

Applicant

Grower	**Abdul Nawaz** s/o Mian Rafiq Awan · ID 003-006-0003
CNIC · mobile	38403-8712277-5 · 03377259223
Village · circle · passbook	Chak 31 SB · Kot Momin · PB-003-006-0003
Bank account	Bank Alfalah · PK18ALFH6750151981755783

Guarantor

No guarantor given.

Eligibility

Basis	Limit (Rs)
Largest Fertilizer loan	300,000.00
Rs 25,000.00 per surveyed acre × 8.87 acres	221,750.00
40.0% of the expected cane (6,959 md × 425.0)	1,182,960.30
The lowest of these	**221,750.00**
Less: Fertilizer loans already taken this season	− 0.00
Less: other loans still outstanding	− 0.00
Eligible	**221,750.00**

Check	Result	Detail
Grower is active	Yes	
Cane surveyed this season	Yes	8.87 acres, 6,959 md expected
At least 2 acres surveyed	Yes	8.87 acres
No loan written off before	Yes	
Open loans can be recovered from the expected cane	Yes	Rs 0.00

Field survey (loan verification)

Surveyor	Visited	Acres seen (season survey)	Crop condition · stage	Expected yield	Recommendation
surveyor.kot@micromaxsugar.example	01 Nov 2026	8.5 (8.87)	Good · Grand growth	780.0 md / acre	**Recommend a lower amount** — Rs 120,000.00

Surveyor: "Good stand, canal irrigated; 0.4 acre patchy near the water course" · photos taken at 32.0862, 72.6734

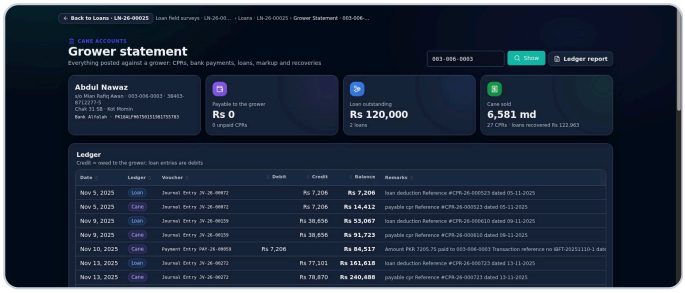

Request and approval

Applied for	Eligible	Approved	Markup	Recovered from each CPR
150,000.00	221,750.00	**120,000.00**	12.0% a year	up to 40.0% of its net after TPT

Loan application (A4, with QR): applicant, eligibility and checks, field survey, approval.

Application (PDF) on the loan prints the whole case for the file and signatures. It is also kept in the Document vault.

Grower statement (Cane Accounts → Grower statement) shows his cane, payments, loans, markup and recoveries with a running balance.

Loan outstanding Rs 1,20,000; recovered from his next CPRs.

If something goes wrong

You see	Do this
"Not eligible: …"	A check failed. See the ✗ in Eligibility.
"The field survey for this loan is not done yet"	Send it to a surveyor, then wait for the survey.
"Approve at most the recommended …"	Lower the amount to the recommendation.
"Take at least one photo of the field"	The surveyor must add photo 1.
Location not available	Allow location on the phone and tap Record GPS again.
