MICROMAX SUGAR MILLS ERP · E-SURVEY GUIDE

EagleEye e-survey

How the season's cane is surveyed field by field: the surveyor's phone, attendance with photo and GPS, the field boundary, then devices, overlaps, quotas and insights in the office.

1 · Phone
Approved device, PIN, check-in.

2 · Survey
Grower, crop, variety, boundary, photos.

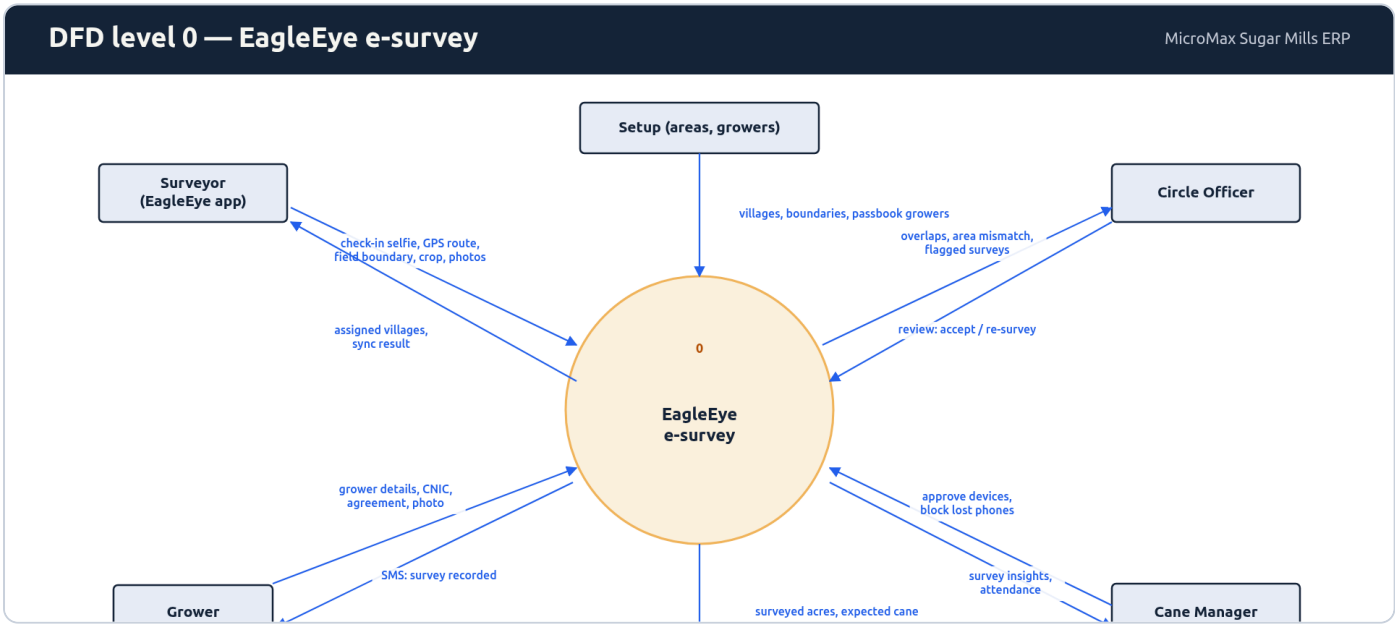

3 · Sync
Sent when there is signal; checked.

4 · Review
Overlaps to the circle officer.

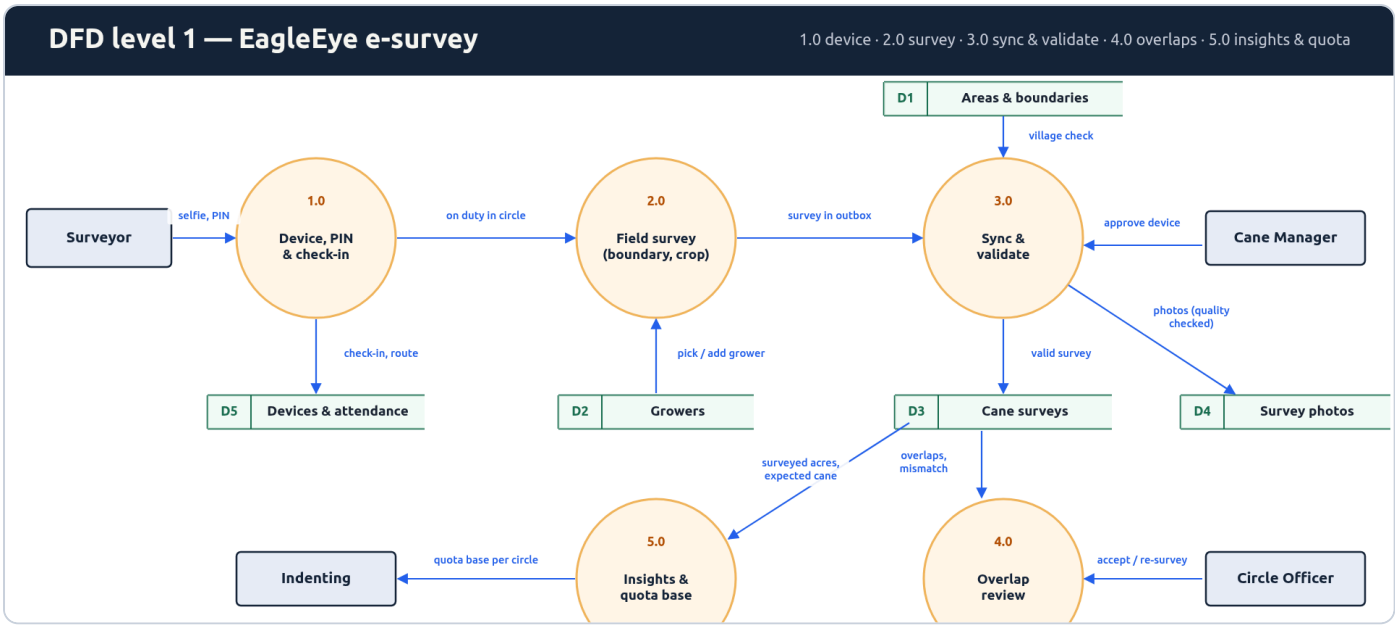

5 · Quota
Surveyed cane sets each circle's quota.

Who: **Surveyor** (phone), **Circle Officer** (overlaps), **Cane Manager** (devices, quotas).

DFD level 0 — EagleEye e-survey MicroMax Sugar Mills ERP

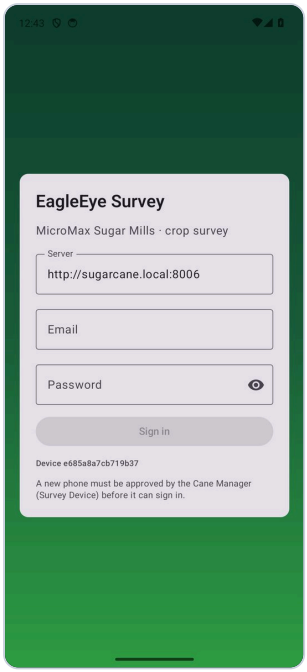

DFD level 0 — e-survey.

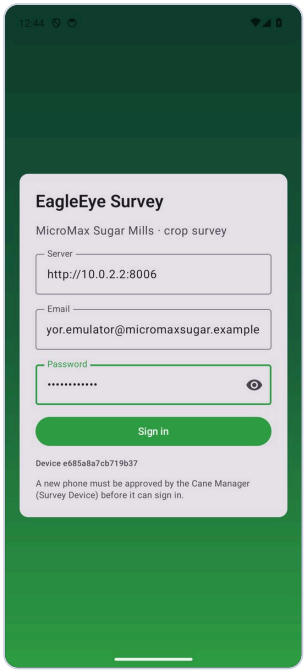

DFD level 1 — e-survey.

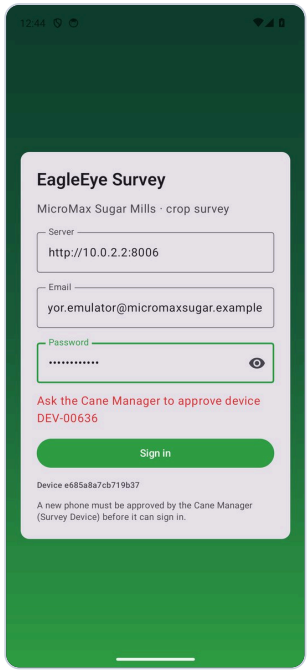

On the phone

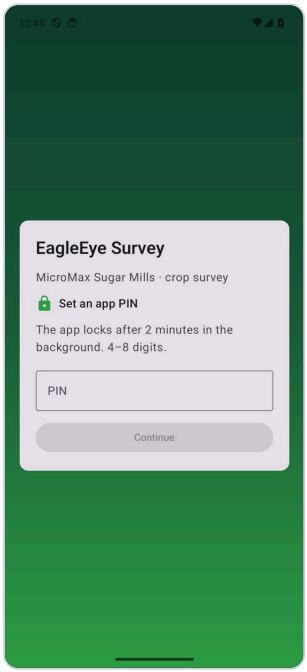

1 · Open EagleEye — The surveyor opens the EagleEye app on their phone.

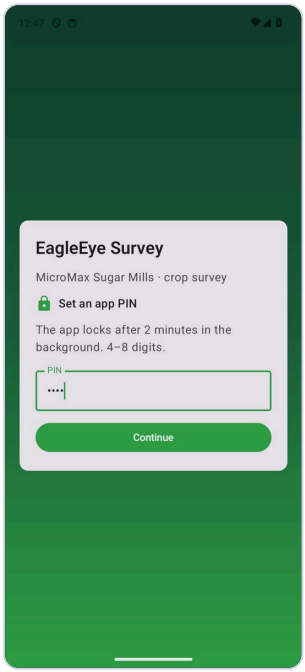

2 · Sign in — The mill's server address, the surveyor's own e-mail and password.

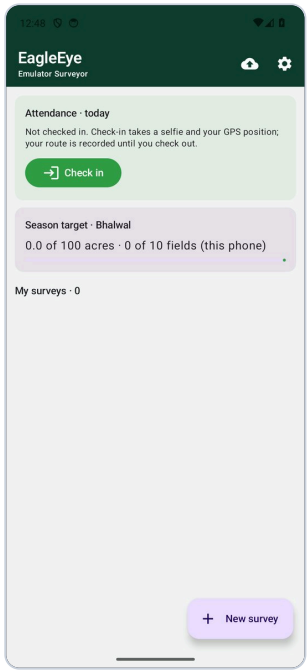

3 · Device approval — A new phone is blocked: "Ask the Cane Manager to approve device DEV-00636".

4 · Set an app PIN — The app locks itself after 2 minutes in the background. 4–8 digits.

5 · Repeat the PIN — Typed twice to confirm.

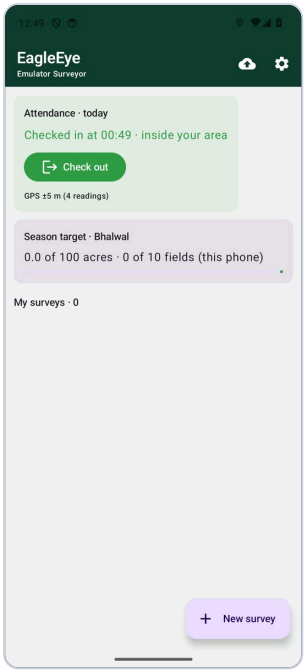

6 · Home — Attendance, the season target for the circle and the surveyor's own surveys.

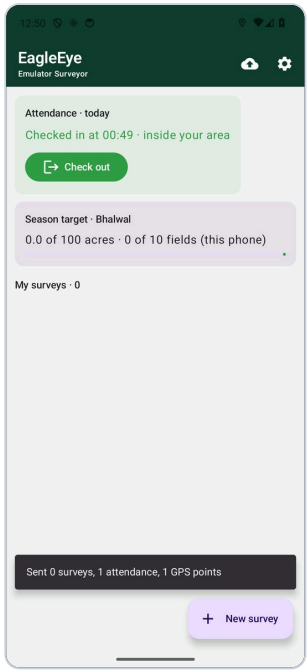

On the phone (continued)

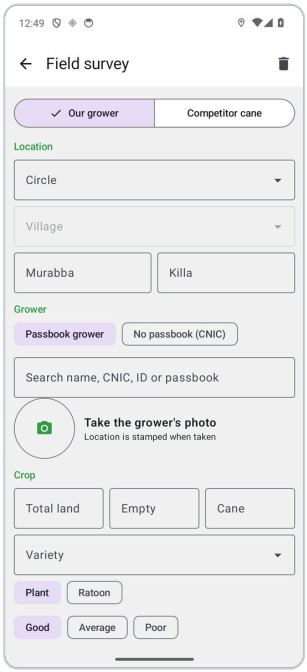

7 · Check in with a photo — Check-in takes the surveyor's photo and the phone's GPS position.

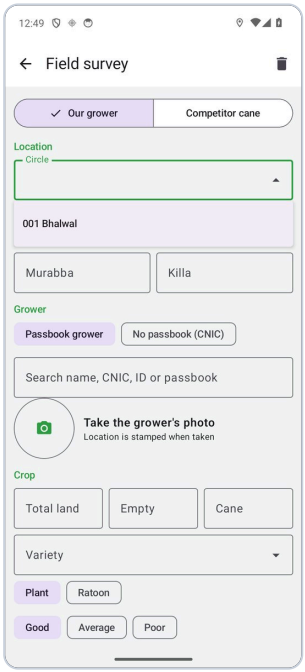

8 · Checked in — Inside the surveyor's area; the route is recorded until check-out.

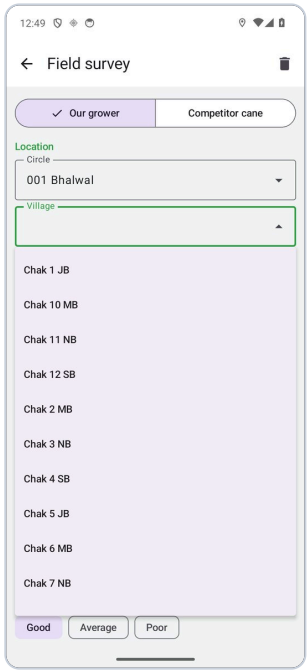

9 · Sync — Attendance and GPS points go up whenever there is signal.

10 · New field survey — Our grower, or a competitor's cane for market share.

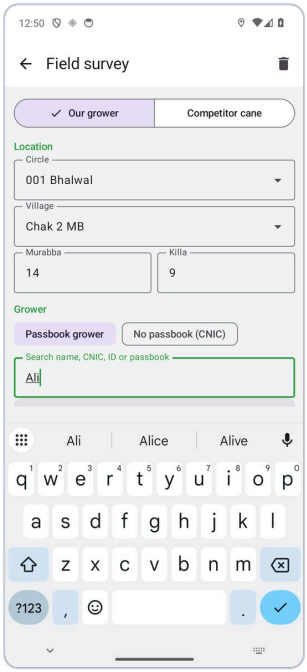

11 · Circle — Only the surveyor's own circles are offered.

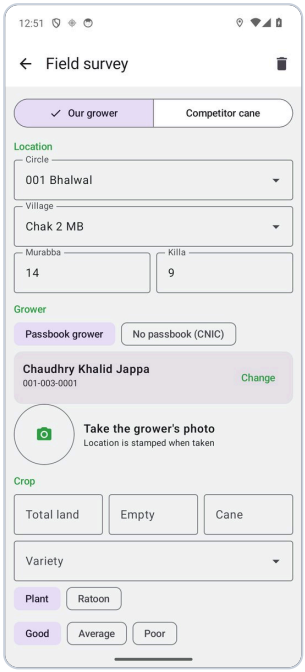

12 · Village — Then the village inside that circle.

On the phone (continued)

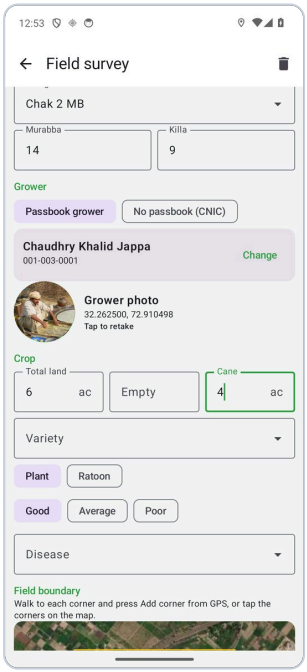

13 · Find the grower — Search by name, CNIC, grower ID or passbook number.

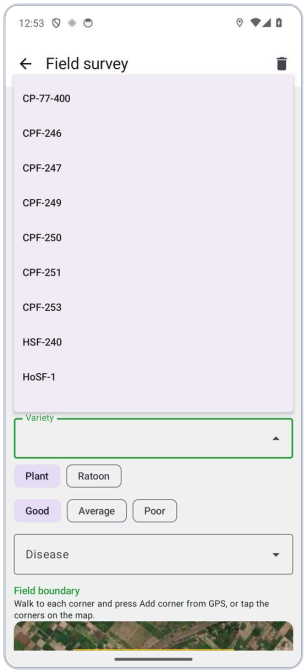

14 · Grower linked — Murabba and killa entered; the grower's record is linked to the field.

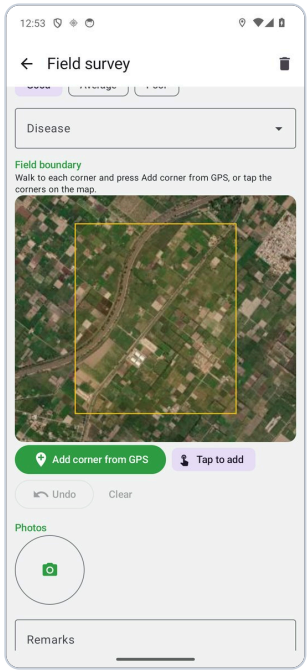

15 · Grower photo — The grower is photographed at his own field, beside the cane.

16 · Crop — The photo is stamped with its location. Total land and cane area.

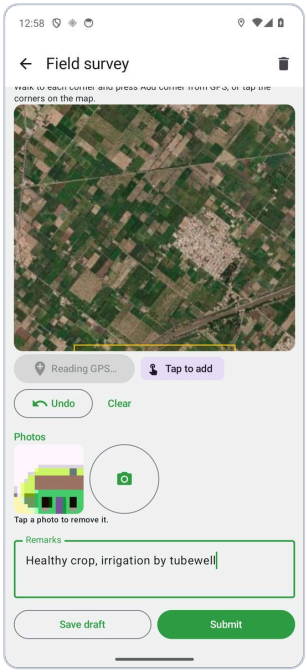

17 · Variety — From the mill's variety list; then plant or ratoon and crop condition.

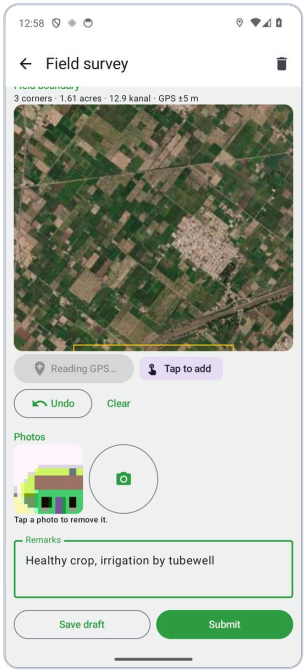

18 · Field boundary — Walk to each corner and press Add corner from GPS, or tap the corners on the map.

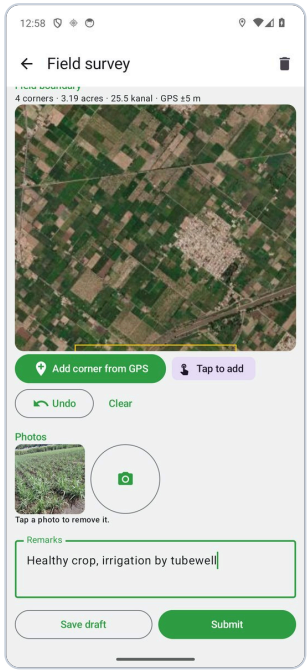

On the phone (continued)

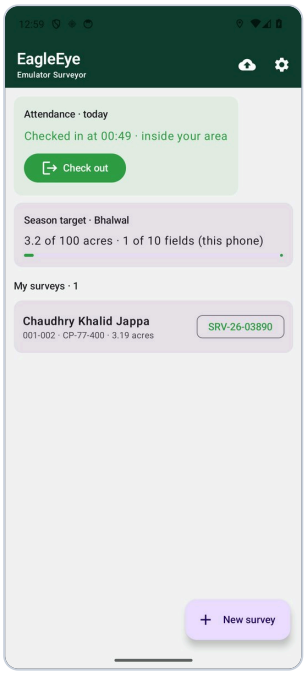

19 · Corners — Each corner comes from the phone's GPS.

20 · Area measured — Four corners: 3.19 acres, 25.5 kanal, inside the village boundary.

21 · Photos and remarks — Field photos and remarks, then Submit, or save a draft.

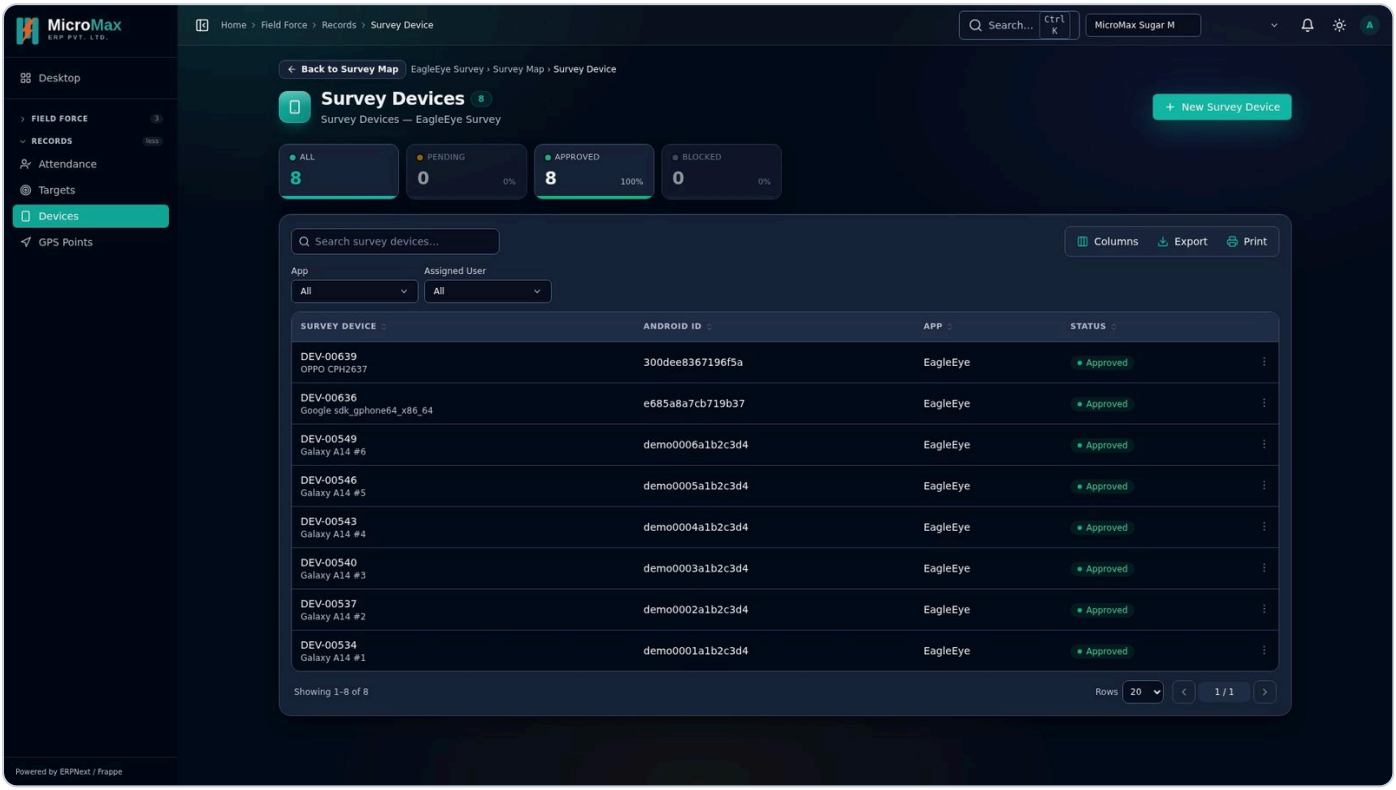

22 · Submitted and sent — SRV-26-03890 is on the phone and already sent to the mill.

In the office

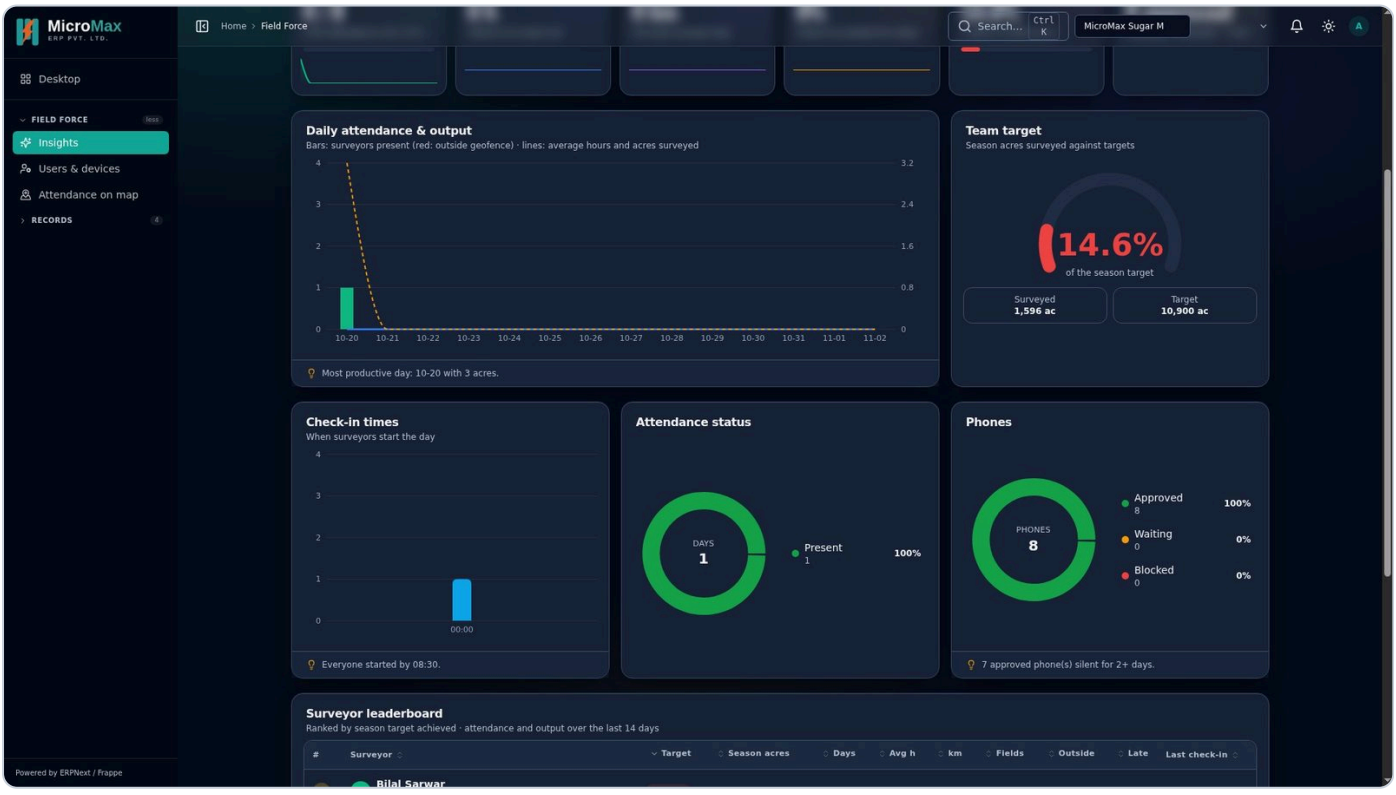

1 · Survey devices

Every phone is bound to one surveyor. A new phone waits as **Pending** until the Cane Manager approves it; a lost phone is **Blocked**.

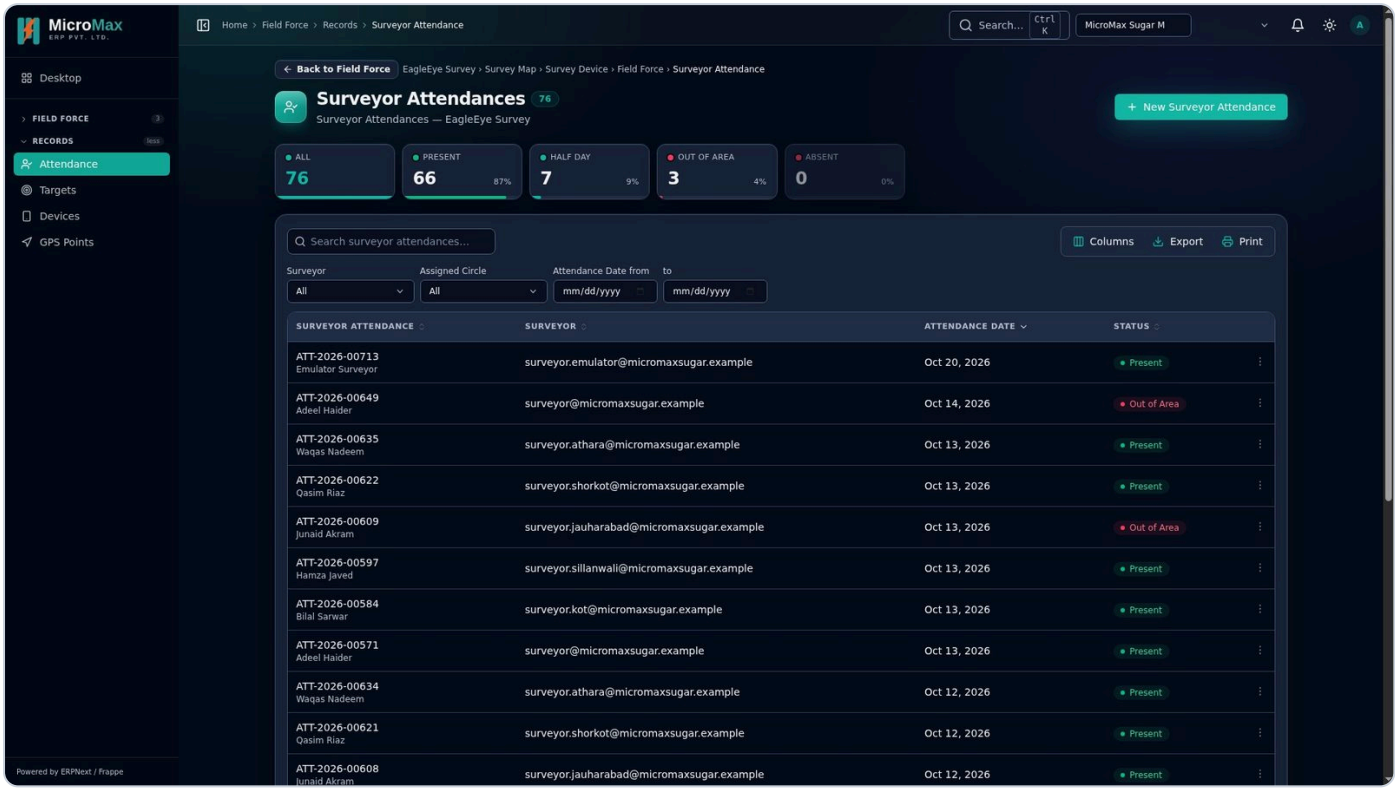

2 · Field force

Daily attendance and acres surveyed, check-in times, team target, and phones silent for 2+ days.

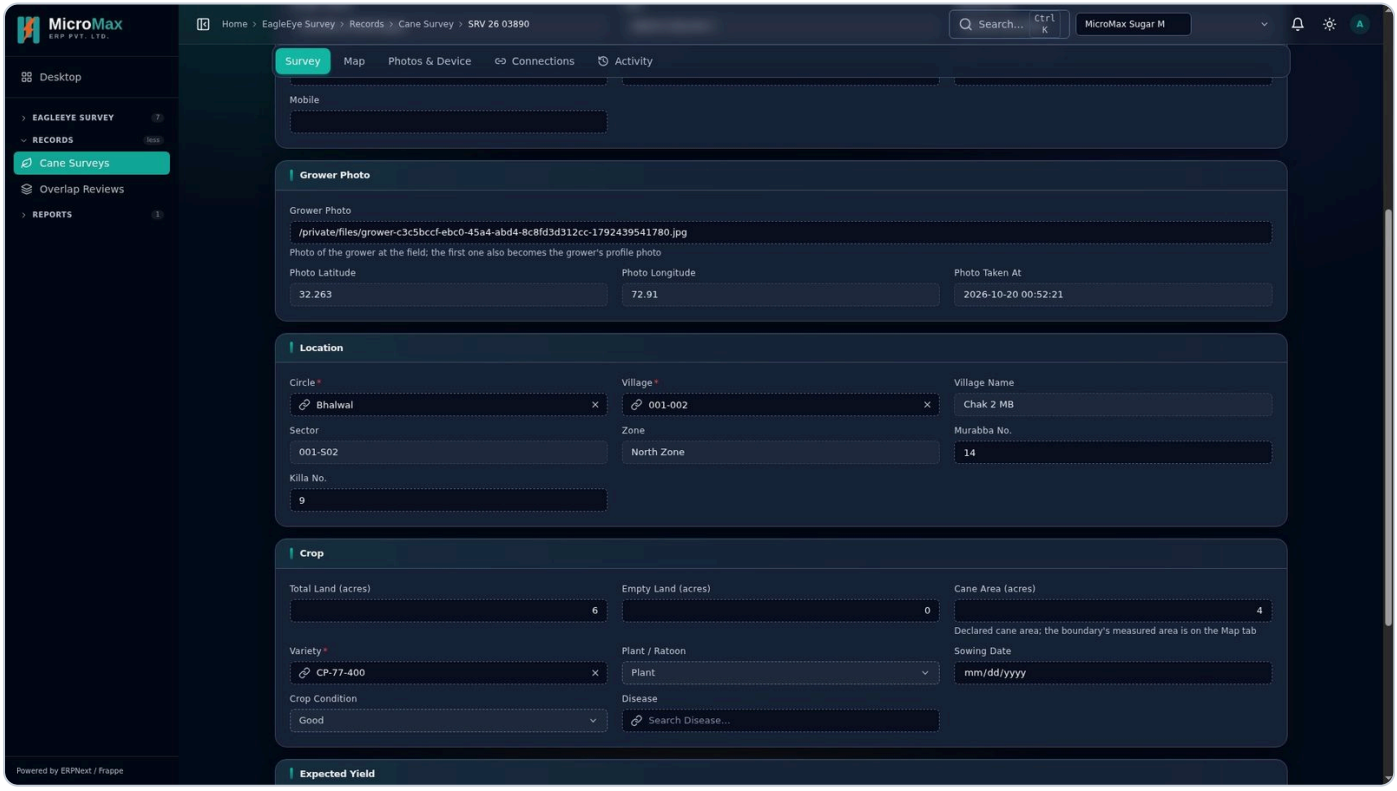

3 · Surveyor attendance

Each check-in with its photo and GPS: present, half day or out of area.

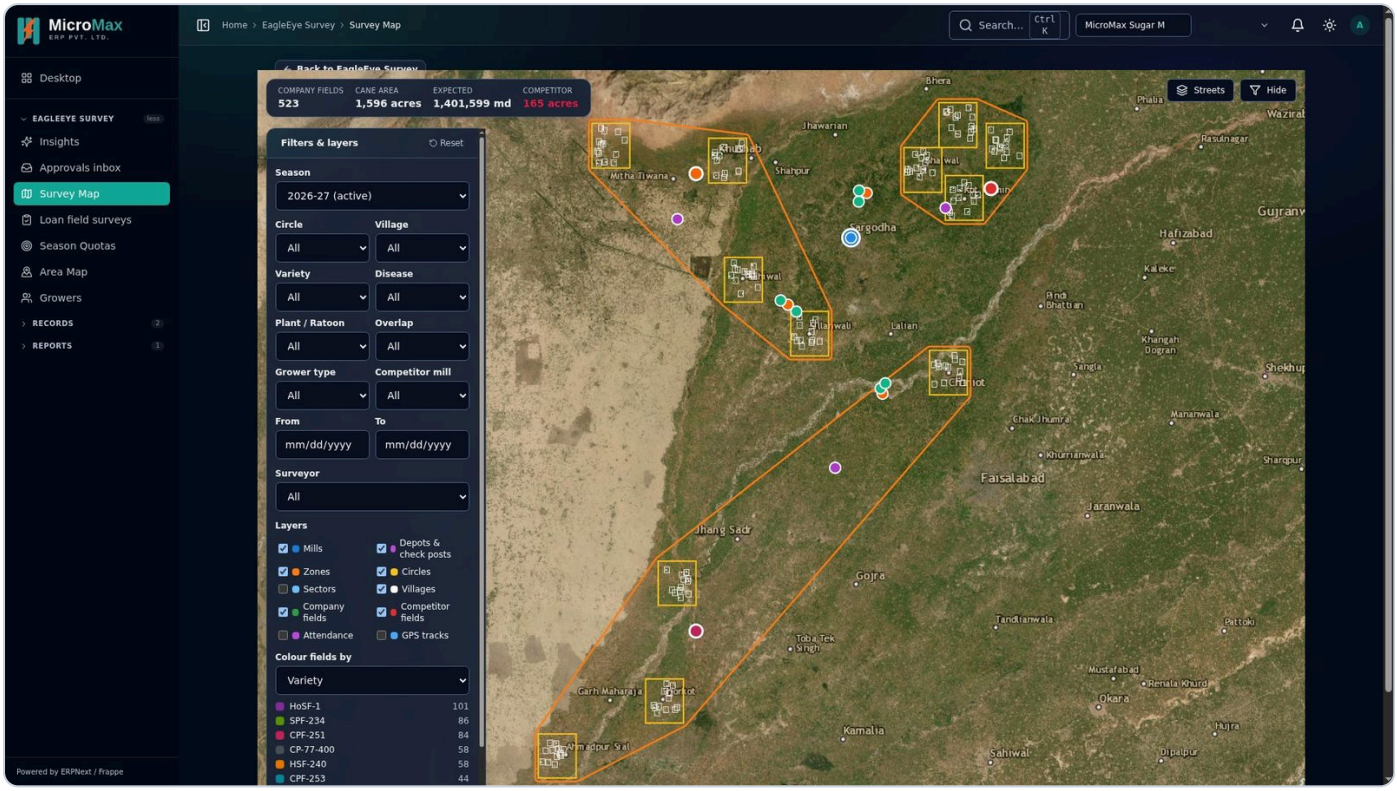

4 · The survey in the ERP

Grower photo with location and time, circle, village, murabba / killa, land and cane area, variety, plant / ratoon, condition.

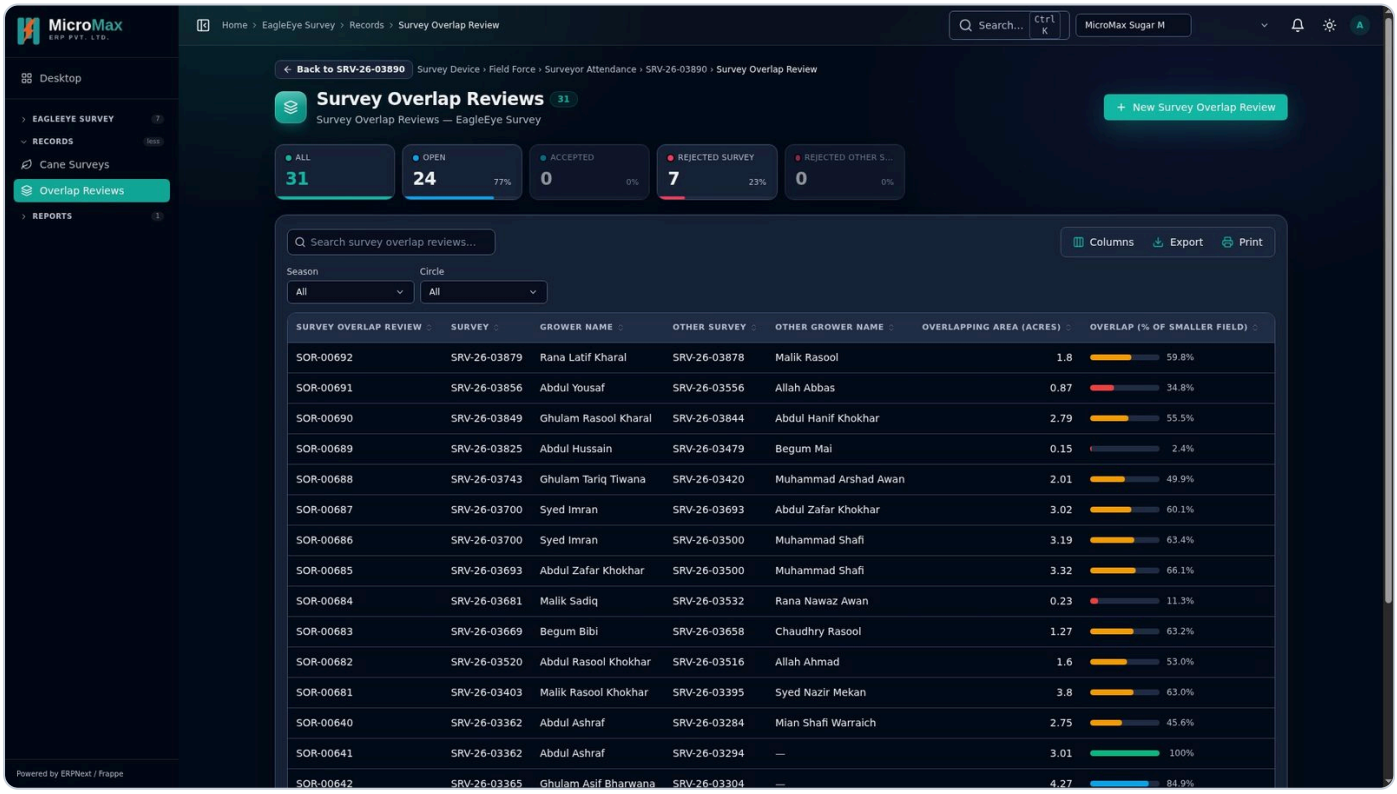

5 · Survey map

Every field on the satellite map; filter by season, circle, village, variety, disease and surveyor; colour by variety.

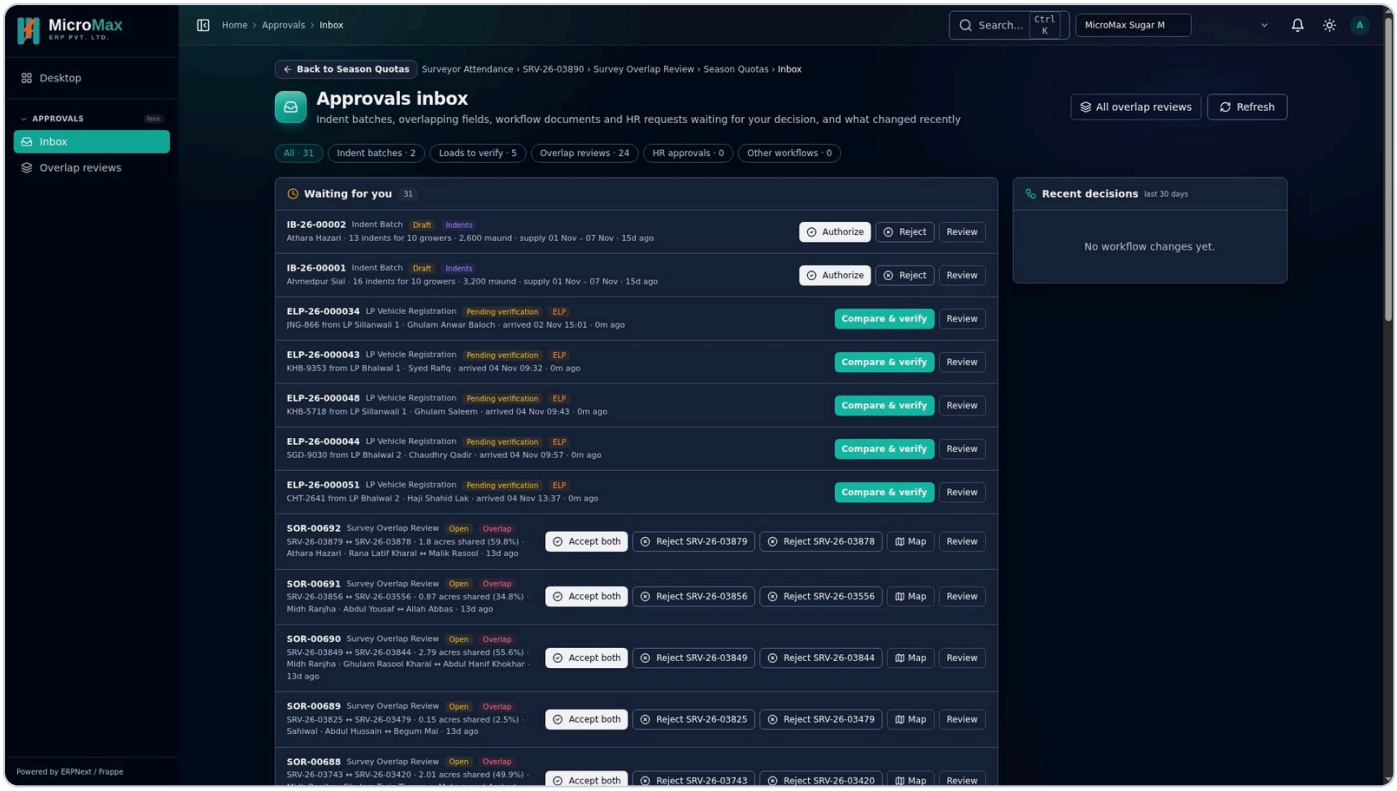

6 · Overlap reviews

A field that overlaps another goes to the circle officer: **accept both** or **reject** one survey.

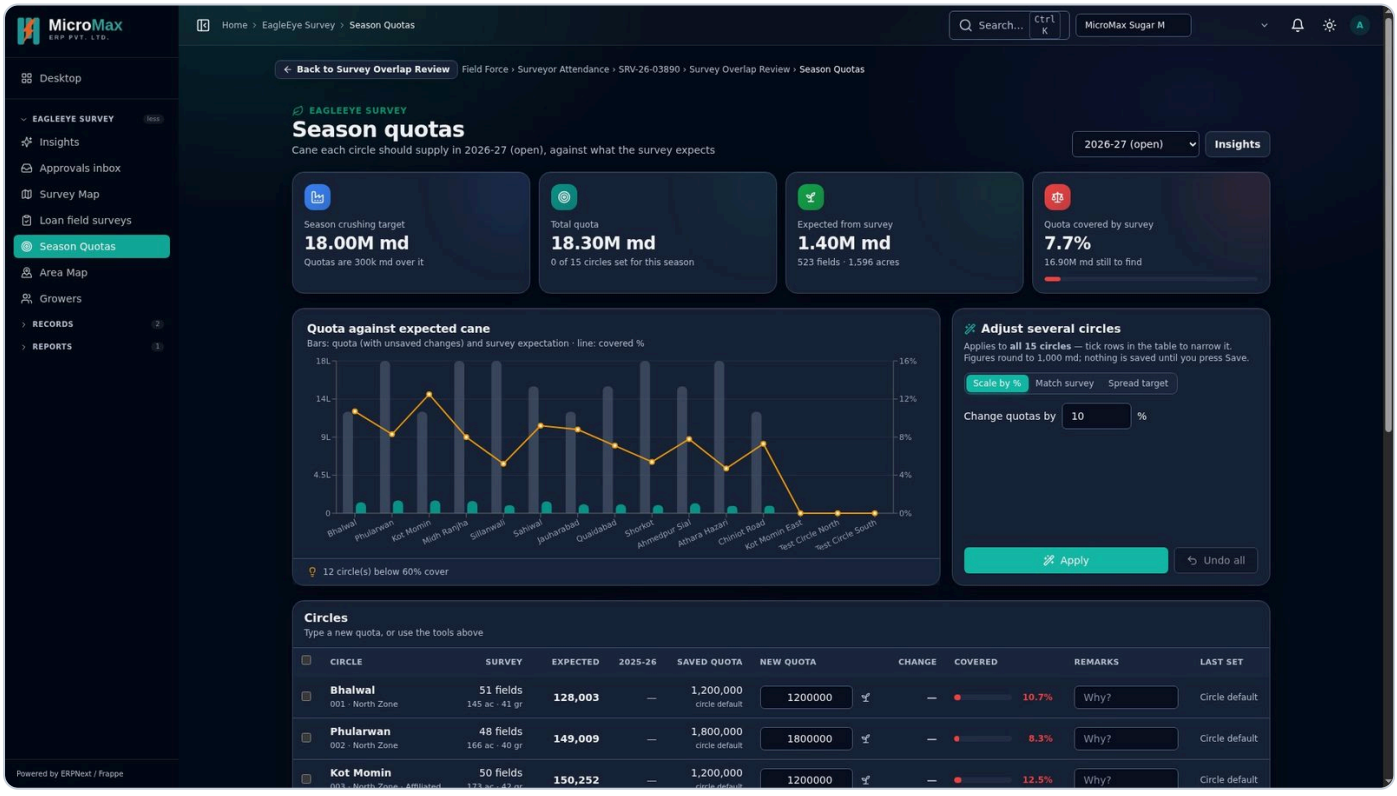

7 · Approvals inbox

Overlap reviews, indent batches and loads to verify — every decision in one place.

8 · Season quotas

Expected cane from the survey against each circle's quota; change several circles at once by a percentage.

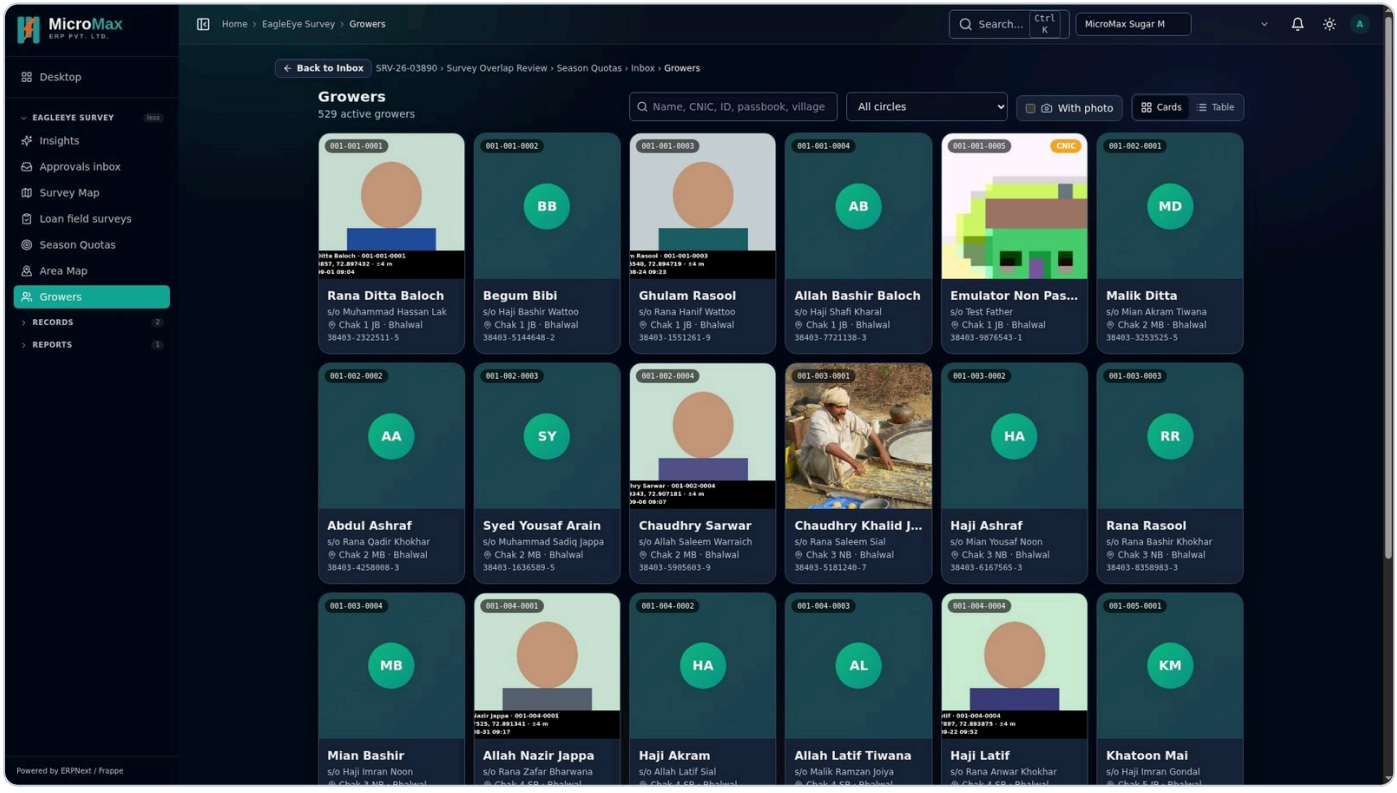

9 · Crop survey insights

Surveyed area, expected cane, quota covered, growers surveyed, ratoon and disease, competitor cane, weekly pace.

10 · Growers

The growers with the photo taken at their field — ready for indenting.

If something goes wrong

You see	Do this
“Ask the Cane Manager to approve device …”	Survey Devices → set the phone to Approved.
Check-in says *out of area*	Check in inside your circle; the time still counts as half day.
“The boundary is outside the village”	Walk the corners again with GPS, or pick the right village.
Survey stays in the outbox	It is sent when there is signal; tap Sync.
Overlap review opened	Circle officer: accept both, or reject the wrong survey for re-survey.

Screens from the MicroMax test system with demo data (2 November 2026).
